

The following people have been involved in libdbi development:

Main developers:

- * David A. Parker <david at neongoat.com>
- * Mark Tobenkin <mark at brentwoodradio.com>

Driver developers:

- * MySQL - Mark Tobenkin <mark at brentwoodradio.com>
- * PostgreSQL - David A. Parker <david at neongoat.com>

These people have also contributed to the project:

- * Markus Hoenicka <hoenicka_markus at compuserve.com>
 - win32 port, atoll() portability, list_* tweaks, assorted bugfixes, error_flag scheme
- * Christian M. Stangren <christian at centiongroup.com>
 - bugfixes, mysql tweaks, list_* tweaks, error tweaks
- * Ryan Eatmon <reatmon at jabber.org>
 - bugfixes
- * Andreas Johansson <andreas.johansson at cention.se>
 - beginnings of sequencing
- * Ron Arts <raarts at netland.nl>
 - caught large memory leak
- * sad@spider.ru
 - atoll.c bugfix
- * Christophe GIAUME <christophe at giaume.com>
 - Solaris asprintf bugfix
- * jellifish <jellyfish at pisem.net>
 - fixed wrong mysql INSERT query behavior

Thanks:

- * Vorbis and Icecast contributors. Monty, Jack, and all the rest are coding machines.
- * The authors of libao, which clued me in to dynamic libraries.
- * Randy Jay Yarger, George Reese, and Tim King (authors of MySQL & mSQL by O'Reilly)
