

2004-09-13 Anders Carlsson <andersca@gnome.org>
* configure.in: Release 2.8.0
* NEWS: Update
===== 2.7.92 =====

2004-08-30 Anders Carlsson <andersca@gnome.org>
* configure.in: Release 2.7.92

2004-08-16 Christian Rose <menthos@menthos.com>
* configure.in: Added "bs" to ALL_LINGUAS.
===== 2.7.91 =====

2004-08-16 Anders Carlsson <andersca@gnome.org>
* configure.in: Release 2.7.91

2004-08-13 Kjartan Maraas <kmaraas@gnome.org>
* configure.in: Added nb to ALL_LINGUAS.

2004-07-09 Sven Herzberg <herzi@gnome-de.org>
* libgnomecanvas/gnome-canvas-util.h: fixed an error when compiling
third party software that doesn't include gnome-canvas.h before
gnome-canvas-util.h
===== 2.7.1 =====

2004-05-31 Anders Carlsson <andersca@gnome.org>
* configure.in: Release 2.7.1
* NEWS: Update

2004-05-20 Matthias Clasen <mclasen@redhat.com>
* docs/reference/libgnomecanvas.types: Include gnome-canvas-clipgroup.h.

2004-05-13 James Henstridge <james@daa.com.au>
* configure.in (ACLOCAL_AMFLAGS): set so that aclocal gets called
with contents of \$ACLOCAL_FLAGS environment variable.
(AC_PROG_YACC): libgnomecanvas doesn't care about yacc
(PATH_TO_XRDB): or xrdb

2004-05-11 James Henstridge <james@daa.com.au>
* configure.in: use AM_GLIB_DEFINE_LOCALEDIR() to define the
locale directory.
Use AC_HELP_STRING to format help string for the
--disable-rebuilds command.

2004-05-05 James Henstridge <james@daa.com.au>

* libgnomecanvas/Makefile.am (CLEANFILES): remove
gnome-canvas-marshal.[ch] on "make clean".

* tests/Makefile.am (AM_LDFLAGS): change from LDFLAGS, as
suggested by automake

* docs/reference/Makefile.am: use gtk-doc.make so that boilerplate
reference documentation build rules don't need to be maintained
here.

* Makefile.am: require automake-1.7. Enable docs building during
distcheck.

* configure.in: update configure script to match more recent
style.

* autogen.sh (REQUIRED_AUTOMAKE_VERSION): require Automake 1.7.

===== 2.6.1.1 =====

2004-04-20 Anders Carlsson <andersca@gnome.org>

* configure.in: Fix soname and release 2.6.1.1

===== 2.6.1 =====

2004-04-19 Anders Carlsson <andersca@gnome.org>

* configure.in: Version 2.6.1 "Girzby"

* NEWS: Update

2004-04-16 Iñaki Larrañaga <dooteo@euskalgnu.org>

* configure.in: Added "eu" (Basque) to ALL_LINGUAS.

2004-04-09 Guntupalli Karunakar <karunakar@freedomink.org>

* configure.in: Added "gu" (Gujarati) to ALL_LINGUAS.

===== 2.6.0 =====

2004-03-22 Anders Carlsson <andersca@gnome.org>

* configure.in: Version 2.6.0 "Skree"

* Makefile.am (EXTRA_DIST): Add NEWS

* NEWS: Update

2004-03-16 Gareth Owen <gowen72@yahoo.com>

* configure.in: Added en_GB to ALL_LINGUAS

2004-03-15 Anders Carlsson <andersca@gnome.org>

* configure.in: Release 2.5.92

2004-03-09 Anders Carlsson <andersca@gnome.org>

* configure.in: Release 2.5.91

2004-03-04 Guntupalli Karunakar <karunakar@freedomink.org>

* configure.in: Added "pa" (Punjabi) to ALL_LINGUAS.

2004-03-04 Glynn Foster <glynn.foster@sun.com>

* configure.in, libgnomecanvas/Makefile.am,
* libgnomecanvas/libgnomecanvas-2.0-uninstalled.pc.in:
Add uninstalled pkg config file.

2004-02-25 Danilo Å egan <dsegan@gmx.net>

* configure.in: Added sr@ije to ALL_LINGUAS.

2004-02-24 Anders Carlsson <andersca@gnome.org>

* configure.in: Release 2.5.90

2004-02-03 Christian Rose <menthos@menthos.com>

* configure.in: Added "en_CA" to ALL_LINGUAS.

2004-02-03 Anders Carlsson <andersca@gnome.org>

* configure.in: Release 2.5.4

2004-01-23 Kjartan Maraas <kmaraas@gnome.org>

* demos/canvas-curve.c: Remove trailing commas from enums. Fixes
portability issues. Patch from "The Written Word". Closes bug #131350.
* libgnomecanvas/gnome-canvas-bpath.c: Same.
* libgnomecanvas/gnome-canvas-polygon.c: Same.
* libgnomecanvas/gnome-canvas-rect-ellipse.c: Same.
* libgnomecanvas/gnome-canvas-rich-text.c: Same.
* libgnomecanvas/gnome-canvas-shape.c: (gcbp_draw_ctx_unref): Same.

2004-01-21 Kjartan Maraas <kmaraas@gnome.org>

* libgnomecanvas/gnome-canvas-rich-text.c:
(gnome_canvas_rich_text_class_init),
(gnome_canvas_rich_text_get_property): Add _set methods
for height and width. Fixes bug #112865 and others. Patch
by Kristian Rietveld <kris at gtk org>

2004-01-14 Anders Carlsson <andersca@gnome.org>

* configure.in: Release 2.5.3

2003-12-28 Anders Carlsson <andersca@gnome.org>

* configure.in: Release 2.5.2

2003-12-10 Richard Hult <richard@imendio.com>

* docs/reference/libgnomecanvas-docs.sgml: Make this valid xml so
that gtk-doc doesn't fall back to the old output.

2003-12-08 Anders Carlsson <andersca@gnome.org>

* configure.in: Release 2.5.1

2003-11-24 Anders Carlsson <andersca@gnome.org>

* configure.in: Release 2.5.0

2003-10-07 Åygyimantas BeruÅ ka <uid0@tuxfamily.org>

* configure.in: Added "lt" to ALL_LINGUAS

2003-09-11 Jody Goldberg <jody@gnome.org>

For David Boucher <boudal@wanadoo.fr>
* libgnomecanvas/gnome-canvas-path-def.c
(gnome_canvas_path_def_concat) : A bpath is not of size 1, copy the
full path.

2003-09-01 Anders Carlsson <andersca@gnome.org>

* configure.in: Release 2.4.0

2003-09-01 Christian Rose <menthos@menthos.com>

* configure.in: Added "ne" to ALL_LINGUAS.

2003-08-31 Laurent Dhima <laurenti@alblinux.net>

* configure.in: Added "sq" to ALL_LINGUAS.

2003-08-25 Anders Carlsson <andersca@gnome.org>

* configure.in: Release 2.3.7

2003-08-11 Anders Carlsson <andersca@codefactory.se>

* configure.in: Release 2.3.6

2003-08-07 Anders Carlsson <andersca@codefactory.se>

* configure.in:
* docs/reference/Makefile.am:
* docs/reference/libgnomecanvas-docs.sgml:
* libgnomecanvas/gnome-canvas.c:
Generate xml documentation.

Fri Aug 01 11:49:34 2003 George Lebl <jirka@5z.com>

* libgnomecanvas/gnome-canvas.c: Inside the do_update function it is
possible that during picking we emitted an event in which the user
then called some function which then requested update of something.
We thus need to check again if we need to update stuff as without
that we'd be left in a state where need_update would have been left
TRUE and the canvas would have been left unpainted until another
expose event.

2003-07-10 Joel Brich <joel.brich@laposte.net>

* configure.in: Added "eo" to ALL_LINGUAS.

2003-06-20 SamÃ°el JÃ³n Gunnarsson <sammi@techattack.nu>

* configure.in: Added "is" to ALL_LINGUAS

2003-06-16 Taneem Ahmed <taneem@eyetap.org>

* configure.in: Added "bn" to ALL_LINGUAS.

2003-06-11 Kenneth Rohde Christiansen <kenneth@gnu.org>

* configure.in: Added "li" to ALL_LINGUAS.

2003-05-18 Martin Kretzschmar <m_kretzschmar@gmx.net>

Implement general clipping in clipgroup. Fixes bug #104602.

2001-12-06 Lauris Kaplinski <lauris@kaplinski.com>

* gnome-canvas-clipgroup.c (gnome_canvas_clipgroup_update): Invoke parent method with NULL clippath, recalculate bounding box (gnome_canvas_clipgroup_render): Implement, do buffer/buffer clipped composition here (gcg_buf_new): Quick'n'dirty buffer cache (gcg_buf_free): Ditto (gcg_mask_new): Ditto (gcg_mask_free): Ditto

2003-05-13 Telsa Gwynne <hobbit@aloss.ukuu.org.uk>

* configure.in: Added "cy" to ALL_LINGUAS.

2003-05-07 Abel Cheung <maddog@linux.org.hk>

* configure.in: Added "cs" to ALL_LINGUAS.

2003-05-05 Christian Rose <menthos@menthos.com>

* configure.in: Added sr and sr@Latn to ALL_LINGUAS.

2003-05-03 Kjartan Maraas <kmaraas@gnome.org>

* docs/reference/*: Merged docs from branch.
* libgnomecanvas/gnome-canvas-util.h: Same here.

2003-05-03 Kjartan Maraas <kmaraas@gnome.org>

reviewed by: Tim Janik <timj@gtk.org>

* libgnomecanvas/gnome-canvas-line.c: (gnome_canvas_line_update): Fix for bug #72424. AA Canvas crashes if you create a line that has arrows enabled but not yet any point positions set. Patch from Andreas Holzmann <Andreas.Holzmann@epost.de>.
* libgnomecanvas/gnome-canvas-pixbuf.c: Fix for bug 97604. Certain affine transforms do not work for pixbuf items. Patch from Jim Evins <evins@snaught.com>.
(gnome_canvas_pixbuf_render): Same as above.
* libgnomecanvas/gnome-canvas-shape.c: (gnome_canvas_shape_update): Fix for bug #98258. Outline widths of rect, ellipse, and polygon items don't rotate. Patch from Jim Evins <evins@snaught.com>

Mon Mar 31 07:21:33 2003 Tim Janik <timj@gtk.org>

* libgnomecanvas/gnome-canvas-pixbuf.c:
(gnome_canvas_pixbuf_update): change update logic to fix redrawing bugs.

2003-03-27 Anders Carlsson <andersca@codefactory.se>

* configure.in: Release 2.3.0

2003-03-26 Christian Rose <menthos@menthos.com>

* configure.in: Added "yi" to ALL_LINGUAS.

2003-03-21 Guntupalli Karunakar <karunakar@freedomink.org>

* configure.in: Added "ml" to ALL_LINGUAS

2003-03-19 Paul Duffy <dubhthach@frink.nuigalway.ie>

* configure.in: Added "ga" to ALL_LINGUAS.

2003-03-06 Sebastian Rittau <srittau@jroger.in-berlin.de>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_w2c_d): Corrected docstring so that "returns" is not the first word on a line.
* docs/reference/libgnomecanvas-sections.txt: Inserted *Class definitions into standard sections. Moved *Priv definitions into private sections.
* docs/reference/libgnomecanvas-docs.sgml: Fixed file include: sgml/gnome-canvas-rect-ellipse.sgml -> sgml/gnome-canvas-ellipse.sgml

2003-02-27 Hans Petter Jansson <hpj@ximian.com>

* configure.in: Bump to 2.2.0.2.

2003-02-27 Mike Kestner <mkestner@ximian.com>

* libgnomecanvas/gnome-canvas.c (emit_event): use gdk_event_copy and gdk_event_free to dup the event.

2003-02-27 Hans Petter Jansson <hpj@ximian.com>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_map): Reinstate the idle update handler if necessary.
(gnome_canvas_request_update_real): No longer assert that we have an idle handler when we need an update. Only add the idle handler if we're mapped.

2003-02-24 Jody Goldberg <jody@gnome.org>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_request_redraw_uta) : Alex's analysis that need_redraw can be true with idle_id == 0. If so we need to queue an idle handler or we'll never actually draw anything. I just hope this does not set up a cycle.

2003-02-21 Roozbeh Pournader <roozbeh@sharif.edu>

* configure.in: Added "fa" to ALL_LINGUAS.

2003-02-09 Christian Rose <menthos@menthos.com>

* configure.in: Added "kn" to ALL_LINGUAS.

2003-02-06 Christian Rose <menthos@menthos.com>

* configure.in: Added "id" to ALL_LINGUAS.

2003-01-23 Alexander Larsson <alexl@redhat.com>

* libgnomecanvas/Makefile.am (libgnomecanvas_2_la_LDFLAGS):
Correct version number error.

* configure.in:
Add EXTRAVERSION and set to .1
Added missing languages to ALL_LINGUAS.

2003-01-22 Alexander Larsson <alexl@redhat.com>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_request_redraw_uta):
Comment out assert that caused lots of crashes.

2003-01-22 Christian Rose <menthos@menthos.com>

* configure.in: Added "mn" to ALL_LINGUAS.

2003-01-19 Marius Andreiana <marius_galuna.ro>

* configure.in: added 'ro' to ALL_LINGUAS

2003-01-16 Sebastian Rittau <srittau@jroger.in-berlin.de>

* libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_init):
Initialize shape->priv->scale to 1.0.

2003-01-09 Tor Lillqvist <tml@iki.fi>

* configure.in: Similar setup for Win32 build as DLL as in glib
etc: Call AC_LIBTOOL_WIN32_DLL. Check for native Win32 or Win32
platform in general (including Cygwin). Set automake conditionals
OS_WIN32 and PLATFORM_WIN32. Use gcc -mms-bitfields for binary
compatibility with GTK+ DLLs.

* libgnomecanvas/Makefile.am: [Win32] Use -no-undefined. Install
import libraries.

* glade/Makefile.am: [Win32] Use -no-undefined.

* libgnomecanvas/gnome-canvas-util.c
(gnome_canvas_get_miter_points): Use G_PI and G_PI_2 instead of
M_PI and M_PI_2.

2003-01-08 Anders Carlsson <andersca@gnu.org>

* configure.in: Release 2.1.90

2002-12-16 Anders Carlsson <andersca@gnu.org>

* configure.in: Release 2.1.5

2002-12-10 Chema Celorio <chema@celorio.com>

* configure.in (GETTEXT_PACKAGE): remove autoheader warning

2002-12-09 Anders Carlsson <andersca@gnu.org>

* configure.in: Release 2.1.4

2002-12-09 Artis Trops <hornet@navigator.lv>

* configure.in: Added Latvian (lv) to ALL_LINGUAS.

2002-11-27 Anders Carlsson <andersca@gnu.org>

* configure.in: Release 2.1.1

2002-11-10 Ole Laursen <olau@hardworking.dk>

* configure.in: Added da to ALL_LINGUAS.

2002-11-09 Dmitry G. Mastrukov <dmitry@taurussoft.org>

* configure.in: Added Belarusian to ALL_LINGUAS

2002-09-27 Anders Carlsson <andersca@gnu.org>

* configure.in: Release 2.1.0

2202-08-24 Sebastian Rittau <srittau@jroger.in-berlin.de>

The following patch needs to go into 2.0.x as well if it doesn't break anything.

* libgnomecanvas/gnome-canvas-shape.c:
(gnome_canvas_shape_update):
(gnome_canvas_shape_bounds): Ensure that path is not NULL before calling gnome_canvas_path_def_any(). Original patch by Andreas Holzmann <Andreas.Holzmann@epost.de>. Bugzilla #74127.

2002-08-23 Federico Mena Quintero <federico@ximian.com>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_expose): Decompose the event's region into rectangles and paint all of them, rather than using the much bigger and wasteful event->area.
(gnome_canvas_request_update_real): Assert for correctness of the idle handler versus the update flag.
(add_idle): Add our idle handler at a priority higher than GDK_PRIORITY_REDRAW -- we must compute updates before drawing.
(gnome_canvas_request_redraw_uta): Assert for correctness of the idle handler versus the redraw flag.
(paint): Don't re-run the update cycle here!

2002-08-19 Gustavo Noronha Silva <kov@debian.org>

* configure.in: Added pt_BR (Brazilian) to ALL_LINGUAS.

2002-08-17 Simos Xenitellis <simos@hellug.gr>

* configure.in: (ALL_LINGUAS) Added Greek (el).

2002-08-13 Andras Timar <timar@gnome.hu>

* configure.in: (ALL_LINGUAS) Added Hungarian (hu).

2002-08-05 Anders Carlsson <andersca@gnu.org>

* configure.in: Release 2.0.2

2002-06-30 Yanko Kaneti <yaneti@declera.com>

* configure.in: (ALL_LINGUAS) Added Bulgarian (bg).

2002-06-11 Anders Carlsson <andersca@gnu.org>

* configure.in: Release 2.0.1

2002-06-09 Jordi Mallach <jordi@sindominio.net>

* configure.in: Added Catalan (ca) to ALL_LINGUAS.

2002-06-07 Anders Carlsson <andersca@gnu.org>

* configure.in: Release 2.0.0

2002-06-07 Anders Carlsson <andersca@gnu.org>

* configure.in:
* tests/Makefile.am:
* tests/test-libglade-canvas.c: (main):
* tests/test-libglade-canvas.glade:
Update version requirements, check in the glade2 file so we
don't have to depend on libglade-convert.

2002-05-13 Anders Carlsson <andersca@gnu.org>

* configure.in: Release 1.117.0

2002-05-10 Naba Kumar <kh_naba@users.sourceforge.net>

* configure.in: Added "hi" to ALL_LINGUAS.

2002-05-07 Federico Mena Quintero <federico@ximian.com>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_request_redraw_uta):
Free the provided microtile array even if we are not drawable.
Clarified docs.

2002-05-03 Sebastian Rittau <srittau@jroger.in-berlin.de>

* libgnomecanvas/gnome-canvas-path-def.c:
(gnome_canvas_path_def_all_open): Document.
(gnome_canvas_path_def_all_closed): Fixed typos in doc string.

* libgnomecanvas/gnome-canvas-util.c:
(gnome_canvas_update_bbox): Fixed doc string.
(gnome_canvas_buf_ensure_buf): dito

* libgnomecanvas/gnome-canvas.c:
(gnome_canvas_new): dito
(gnome_canvas_new_aa): dito

* docs/reference/libgnomecanvas-docs.sgml:

* docs/reference/libgnomecanvas-sections.txt:
* docs/reference/tmpl/*.sgml
Reorganized the chapter structure, gave document a name.

2002-05-02 Federico Mena Quintero <federico@ximian.com>

* libgnomecanvas/gnome-canvas.c
(gnome_canvas_set_pixels_per_unit): If center_scroll_region is off, make the upper-left corner of the window the anchor point for zooming.

2002-05-01 Pablo Saratxaga <pablo@mandrakesoft.com>

* configure.in: Added Vietnamese (vi) to ALL_LINGUAS

2002-04-29 Anders Carlsson <andersca@gnu.org>

* Release 1.116.0

2002-04-25 Jody Goldberg <jody@gnome.org>

* libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_update_gdk)
This code looks suspect.
(gnome_canvas_shape_bounds) : use the right width.

2002-04-22 Anders Carlsson <andersca@gnu.org>

* configure.in:
Release 1.115.0

* Makefile.am:
* message-of-doom:
Remove message-of-doom.

2002-04-22 Anders Carlsson <andersca@gnu.org>

* libgnomecanvas/gnome-canvas.c (emit_event): Remove this VERY VERY annoying warning.

2002-04-17 Federico Mena Quintero <federico@ximian.com>

* libgnomecanvas/gnome-canvas-rich-text.c
(gnome_canvas_rich_text_init): Changed the default of cursor_blink to TRUE.

* */*.[ch]: Replace deprecated GTK+ calls with new ones.

2002-03-28 Jody Goldberg <jody@gnome.org>

* libgnomecanvas/gnome-canvas-clipgroup.c
(gnome_canvas_clipgroup_class_init) : assign virtuals _before_ you install properties. While we're at it lets not use C++ keywords for no reason.
(gnome_canvas_clipgroup_get_property) : WIND was registered as a uint, not an enum.
(gnome_canvas_clipgroup_set_property) : ditto.

2002-03-26 Wang Jian <lark@linux.net.cn>

* configure.in: Added "zh_CN" to ALL_LINGUAS.

2002-03-26 Anders Carlsson <andersca@gnu.org>

* configure.in: Up to 1.114.0 and update requirements.

2002-03-15 Federico Mena Quintero <federico@ximian.com>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_key): Chain to the parent class handler so that bindings work. Thanks to Dave Camp <dave@ximian.com> for pointing this out.

2002-03-15 Jody Goldberg <jody@gnome.org>

* libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_set_property) : Accept NULL fill/outline gdk colours and give them the same meaning as non-gdk versions.

2002-03-18 Anders Carlsson <andersca@gnu.org>

* configure.in: Up to 1.113.0

2002-03-13 Federico Mena Quintero <federico@ximian.com>

* libgnomecanvas/gnome-canvas.c
(gnome_canvas_set_center_scroll_region): New function.
(gnome_canvas_get_center_scroll_region): New function.
(scroll_to): Handle the center_scroll_region property. Copied from Alexander Larsson's (alla@lysator.liu.se) code in the foocanvas module.
(gnome_canvas_init): Start with center_scroll_region set to TRUE to be compatible with GNOME 1.4.

2002-03-12 Changwoo Ryu <cwryu@debian.org>

* configure.in: Added 'ko' to ALL_LINGUAS.

2002-03-05 Christian Meyer <chrisime@gnome.org>

* configure.in: Added 'de' to ALL_LINGUAS.

2002-03-04 Anders Carlsson <andersca@gnu.org>

* configure.in: Release 1.112.1

2002-03-03 Tõnu Leedjärv <leedjarv@interest.ee>

* configure.in (ALL_LINGUAS): Added et (Estonian).

2002-03-01 Pauli Virtanen <pauli.virtanen@hut.fi>

* configure.in (ALL_LINGUAS): Added fi (Finnish).

2002-02-28 Zbigniew Chyla <cyba@gnome.pl>

* configure.in (ALL_LINGUAS): Added pl (Polish).

2002-02-25 Darin Adler <darin@bentspoon.com>

* glade/glade-canvas.c: Remove unneeded <ctype.h> include. Part of my crusade against ctype.h.

2002-02-23 JP Rosevear <jpr@ximian.com>

* libgnomecanvas/gnome-canvas-pixbuf.c (compute_viewport_affine):
properly compute ti_len for NW/W/SW anchors

2002-02-20 Murray Cumming <murrayc@usa.net>

* libgnomecanvas.h/gnome-canvas.h:
Removed gnome_canvas_item_scale() and gnome_canvas_item_rotate()
because they aren't implemented.

2002-02-19 Anders Carlsson <andersca@gnu.org>

* configure.in: Release 1.112.0

2002-02-18 Gediminas Paulauskas <menesis@delfi.lt>

* configure.in: remove GNOME_COMMON_INIT, GNOME_PLATFORM_GNOME_2,
and fix GNOME_COMPILE_WARNINGS macros for latest gnome-common.

2002-02-15 Jody Goldberg <jody@gnome.org>

* libgnomecanvas/gnome-canvas-widget.c (gnome_canvas_widget_destroy) :
handle multiple calls to destroy.

2002-02-11 Anders Carlsson <andersca@gnu.org>

* configure.in: Release 1.111.0

2002-01-29 Lauris Kaplinski <lauris@ximian.com>

* libgnomecanvas/gnome-canvas-polygon.c (set_points): Just close path -
this is safe to do, as path def checks start/end coordinate match and
appends lineto, if needed

* libgnomecanvas/gnome-canvas.c (scroll_to): Request full update with affine
flag set on offset change, as w2c matrix actually changes. Hopefully fixes
mysterious invisible-until-modified item problem.

2002-01-29 Anders Carlsson <andersca@gnu.org>

* configure.in: Up to 1.110.0

2002-01-26 Alexander Larsson <alla@lysator.liu.se>

* libgnomecanvas/gnome-canvas.c (put_item_after):
Shortcut repaint for all calls to put_item_after() that
doesn't actually modify the child position.

2002-01-24 Alexander Larsson <alla@lysator.liu.se>

* libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_get_property):
Fix typo for PROP_OUTLINE_COLOR_RGBA.

2002-01-24 jacob berkman <jacob@ximian.com>

* Makefile.am (SUBDIRS): revert timj patch again

Thu Jan 24 07:12:04 2002 Tim Janik <timj@gtk.org>

* libgnomecanvas/gnome-canvas.c (paint): put #ifdef VERBOSE
around g_print()s.

2002-01-23 Rodrigo Moya <rodrigo@gnome-db.org>

* Makefile.am: EXTRA_DIST'ed the ChangeLog

* ChangeLog: merged all ChangeLog's into a single file (except
po/ChangeLog :-)

2002-01-23 Lauris Kaplinski <lauris@ximian.com>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_item_get_bounds): Test that xform exists
fixes crash

2002-01-21 Anders Carlsson <andersca@gnu.org>

* libgnomecanvas/gnome-canvas.c (scroll_to): Remove debug print message.

2002-01-21 Alexander Larsson <alla@lysator.liu.se>

* libgnomecanvas/gnome-canvas-clipgroup.c:

* libgnomecanvas/gnome-canvas-shape.c:

Update to use the new libart intersector.

2002-01-18 Hasbullah Bin Pit <sebol@ikhlas.com>

* configure.in: Added 'ms' at ALL_LINGUAS.

* po/ms.po: Added Malay Translation.

2002-01-17 Lauris Kaplinski <lauris@ximian.com>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_item_invoke_update): Clean up code a bit
mostly to help myself to keep track of affine transformations

(gnome_canvas_item_invoke_point): Ditto

(gnome_canvas_item_affine_relative): Ditto

(gnome_canvas_item_affine_absolute): Ditto

(do_update): Start updating root with w2c affine

(scroll_to): Schedule widget redraw if scroll offsets change - this is not
the best approach, but IMHO not too bad either, as this can happen only
if either canvas size or widget size change - not for normal scrolling

2002-01-16 Lauris Kaplinski <lauris@ximian.com>

* libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_update): Check for NULL path
kill warning by path def

(gnome_canvas_shape_bounds): Ditto

* libgnomecanvas/gnome-canvas.c (gnome_canvas_expose): Emit parent class expose event
so widget items get drawn

* libgnomecanvas/gnome-canvas-widget.c (gnome_canvas_widget_render): Comment everything
or we are creating endless stream of exposes

(gnome_canvas_widget_draw): Ditto

* libgnomecanvas/gnome-canvas-util.c (gnome_canvas_update_svp): Clean it up, use rect
coverage for small SVP-s (is much faster).

2002-01-15 Lauris Kaplinski <lauris@ximian.com>

- * libgnomecanvas/gnome-canvas-bpath.c (gnome_canvas_bpath_set_property): Use new signature for setting path to avoid warning
- * libgnomecanvas/gnome-canvas-polygon.c (set_points): Ditto
- * libgnomecanvas/gnome-canvas-rect-ellipse.c (gnome_canvas_ellipse_update): Ditto (gnome_canvas_rect_update): Ditto
- * libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_get_path_def): Signature change, check argument (gnome_canvas_shape_set_path_def): Ditto

2002-01-14 Lauris Kaplinski <lauris@ximian.com>

- * libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_update): Free old SVP-s in Gdk mode (gnome_canvas_shape_point): Just return, if there are no SVP-s, flood warnings, if canvas->need_update is set (gnome_canvas_shape_bounds): Implement

2002-01-14 Jody Goldberg <jody@gnome.org>

- * libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_set_property) : Here we do need to use gdk_rgb_find_color.

2002-01-13 Jody Goldberg <jody@gnome.org>

- * libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_get_property) : Use gdk_colormap_query_color not gdk_rgb_find_color.
- * libgnomecanvas/gnome-canvas-line.c (gnome_canvas_line_get_property) : ditto.
- * libgnomecanvas/gnome-canvas-shape.c (get_color_value) : ditto.

2002-01-13 Jody Goldberg <jody@gnome.org>

- * libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_get_property) : Do not use g_new to allocate (and leak) the color.
- * libgnomecanvas/gnome-canvas-line.c (gnome_canvas_line_get_property) : ditto.
- * libgnomecanvas/gnome-canvas-shape.c (get_color_value) : ditto. (gnome_canvas_shape_set_property) : PROP_FILL_COLOR_GDK, colorptr can be NULL.

2002-01-11 Alex Larsson <alex1@redhat.com>

- * libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_set_property): Set the font description from the gtk context.

2002-01-10 Anders Carlsson <andersca@gnu.org>

- * configure.in: Release 1.109.0

2002-01-09 jacob berkman <jacob@ximian.com>

- * Makefile.am (SUBDIRS):
- * configure.in: revert removal of libglade support

2002-01-09 Darin Adler <darin@bentspoon.com>

- * libgnomecanvas/gnome-canvas.c: (emit_event): Remove some dead code. (boolean_handled_accumulator): Stolen from gtk.

(gnome_canvas_item_class_init): Moved down to the bottom of the file to avoid having to do so many forward declarations. Also changed the "event" signal to use G_SIGNAL_TYPE_STATIC_SCOPE for efficiency, and boolean_handled_accumulator for consistency with event signals in gtk.

Wed Jan 9 06:02:17 2002 Tim Janik <timj@gtk.org>

* libgnomecanvas/gnome-canvas-line.c: fix PROP_FILL_COLOR, PROP_FILL_STIPPLE, PROP_WIDTH_PIXELS and PROP_WIDTH_UNITS properties.

* libgnomecanvas/gnome-canvas-shape.c: fix PROP_FILL_STIPPLE, PROP_OUTLINE_STIPPLE, PROP_WIND, PROP_DASH, PROP_WIDTH_PIXELS and PROP_MITERLIMIT properties.
PROP_WIND: eek this is an uint property eventhough ArtSvpWind is an enum, but doesn't seem to be exported to the typessystem.
at least get the value as uint as well.

* libgnomecanvas/gnome-canvas-shape.c (get_color_value): fix this to use the canvas, not the item as widget.

* libgnomecanvas/gnome-canvas-text.c: fix PROP_CLIP_WIDTH, PROP_FILL_COLOR and PROP_FILL_STIPPLE properties.

* libgnomecanvas/gnome-canvas.c (gnome_canvas_item_get_property): don't cast a NULL object into G_OBJECT().

Sat Jan 5 07:07:08 2002 Tim Janik <timj@gtk.org>

* libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_bounds): issue the warning only once to avoid flooding program output.

2001-12-29 Mark McLoughlin <mark@skynet.ie>

* demos/canvas-curve.c: new file.

* demos/canvas.c, canvas_demo.h: added the bezier curve demo.

2001-12-27 Duarte Loreto <happyguy_pt@hotmail.com>

* configure.in: Added portuguese to ALL_LINGUAS

2001-12-23 Takayuki KUSANO <AE5T-KSN@asahi-net.or.jp>

* configure.in: Added "ja" to ALL_LINGUAS

2001-12-18 Alex Larsson <alexl@redhat.com>

* libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_bounds):
Add g_warning to this unimplemented function.

2001-12-18 Alex Larsson <alexl@redhat.com>

* libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_set_property):
Set the max_width and height properties in set_property instead of doing it in update(), since gnome_canvas_text_bounds() needs that data.

2001-12-17 Darin Adler <darin@bentspoon.com>

* libgnomecanvas/gnome-canvas-rich-text.c: (gnome_canvas_rich_text_update):

Don't try to update the layout if it wasn't allocated yet.

Wed Dec 12 21:45:08 2001 Tim Janik <timj@gtk.org>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_class_init): fix canvas::aa property. it needs to be CONSTRUCT_ONLY because anti-aliased can't be changed after construction. also, this property needs to be boolean and not ulong.

2001-12-12 Alexander Larsson <alla@lysator.liu.se>

* libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_set_font_desc): Fix the text item redraw error. It was setting the bbox without calling gnome_canvas_update_bbox(), so the old bbox was never repainted. Solved by removing the bogus recalc_bounds() function. That is handled by gnome_canvas_item_request_update() anyway.

2001-12-11 Anders Carlsson <andersca@gnu.org>

* configure.in: Up version to 1.108.0

2001-12-11 Alex Larsson <alexl@redhat.com>

* libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_set_property): Unbreak the AA version of the text item. Now it behaves just like the non-aa version, it's even got the same bugs. None of the bad scaling or rotation is left.

2001-12-10 Alexander Larsson <alla@lysator.liu.se>

* libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_class_init): The default value for anchor is actually CENTER.
(gnome_canvas_text_point): y2 needs log_rect.y, not log_rect.x

2001-12-07 Marc Mulcahy <marc.mulcahy@sun.com>

* libgnomecanvas/gnome-canvas-rich-text.(ch): Added gnome_canvas_rich_text_get_iter_location and gnome_canvas_rich_text_get_iter_at_location

2001-12-06 jacob berkman <jacob@ximian.com>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_get_property):
(gnome_canvas_set_property): new functions to se the aa-ness of the canvas
(gnome_canvas_class_init): install an aa property
(gnome_canvas_new_aa): use the aa property

2001-12-02 Malcolm Tredinnick <malcolm@commsecure.com.au>

* configure.in, Makefile.am, docs/*: Add the necessary voodoo to build the API docs.

2001-12-02 Anders Carlsson <andersca@gnu.org>

* libgnomecanvas/gnome-canvas.h: Remove unused signals from vtable and add some padding.

* libgnomecanvas/gnome-canvas.c (gnome_canvas_item_class_init): Remove signals.

(emit_event): Don't emit any other signals than "event".

* libgnomecanvas/gnome-canvas-pixbuf.c (gnome_canvas_pixbuf_draw): Use GDK_PIXBUF_ALPHA_FULL when rendering the pixbuf.

2001-11-28 Anders Carlsson <andersca@gnu.org>

* configure.in: Up version to 1.107.0

2001-11-27 jacob berkman <jacob@ximian.com>

* configure.in: look for libglade-convert

* tests/test-libglade-canvas.c: port libglade's test program to the canvas to test the canvas glade support

* glade/glade-canvas.c (glade_module_register_widgets): use the new custom property api
(set_aa):
(SET_SCROLL):
(set_pixels_per_unit): implement property settings

2001-11-19 Peter Williams <peterw@ximian.com>

* libgnomecanvas/gnome-canvas.c: Remove Michael's marshaller from this file (approved by him).

* libgnomecanvas/gnome-canvas-marshal.list: Add the BOOLEAN_BOXED marshaller here instead of hard-coding it into gnome-canvas.c.

2001-11-19 Michael Meeks <michael@ximian.com>

* libgnomecanvas/gnome-canvas.c (emit_event): remove GTK_OBJECT_DESTROYED checks.

2001-11-19 Alex Larsson <alexl@redhat.com>

* libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_init): Use 10.43 as default miter limit, as this is the default for X11. (gnome_canvas_shape_update_gdk, gnome_canvas_shape_update): Done use the svps to generate bboxes in non-aa mode. They may be slightly different due to rounding to integer coords. Use a precision of 0.1 always in art_bez_path_to_vec().

2001-11-18 Alexander Larsson <alla@lysator.liu.se>

* libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_set_property): Pass screen dpi to pango_ft2_get_context(), as now needed.

2001-11-18 Alex Larsson <alexl@redhat.com>

* libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_set_property): Update to new pangoft2 API.

2001-11-19 Michael Meeks <michael@ximian.com>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_marshall_BOOLEAN_BOXED): impl. (gnome_canvas_item_class_init): upd. to use this.

* libgnomecanvas/libgnomecanvastypes.c: include glib-object.h

2001-11-16 Glynn Foster <glynn.foster@sun.com>

* libgnomecanvas/gnome-canvas-line.c: Removed unused variable stopping build.

2001-11-16 Alex Larsson <alexl@redhat.com>

* libgnomecanvas/gnome-canvas-line.c (item_to_canvas):
Move the subtraction by x/y here.
(gnome_canvas_line_draw): Move subtraction
of x/y into item_to_canvas, and use it for the
arrows too.

2001-11-14 Alexander Larsson <alla@lysator.liu.se>

* libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_update):
Revert all my completely bogus bounding box patches.
Sorry about that.

2001-11-14 Alexander Larsson <alla@lysator.liu.se>

* libgnomecanvas/gnome-canvas-line.c (gnome_canvas_line_draw):
Don't put x and y in the affine transformation. Doing so can
affect the outcome of the affine transformation in a way so that
for lines on position near xxx.5 the result is rounded differently.

2001-11-14 Alexander Larsson <alla@lysator.liu.se>

* libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_update):
Add some epsilon to the bounding box before rounding, to
avoid precision problems.

2001-11-14 Alexander Larsson <alla@lysator.liu.se>

* libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_update_gdk):
Correctly round the coordinates when covertin from the double
vpath to the integer pixel positions.

2001-11-14 Alex Larsson <alexl@redhat.com>

* libgnomecanvas/gnome-canvas-rect-ellipse.c:
Use 8 bezier curve segment instead of a 4 to draw
ellipses.

2001-11-13 Alex Larsson <alexl@redhat.com>

* libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_update):
Actually calculate bounding box for shape items.

2001-11-07 jacob berkman <jacob@ximian.com>

* glade/glade-canvas.c (canvas_new): simplify by extracting our
properties, then using glade_standard_build_widget

* glade/Makefile.am (glademoduledir): install into our prefix
rather than libglade's

* configure.in: remove libglade module dir check

2001-11-06 jacob berkman <jacob@ximian.com>

* libgnomecanvas/gnome-canvas-rich-text.c (gnome_canvas_rich_text_draw): get it to build by passing NULL for widgets

2001-11-06 jacob berkman <jacob@ximian.com>

* glade/glade-canvas.c (canvas_new): function to create a canvas, as we have to handle some properties glade sets ourselves (ie, aa) (glade_module_register_widgets): use new function

2001-10-31 Arjan Molenaar <arjan@xirion.nl>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_set_pixels_per_unit): canvas->scroll_[xy]l should be added to the canvas coordinate instead of subtracted.

* libgnomecanvas/gnome-canvas.c (gnome_canvas_set_scroll_region): use GtkLayout::[hv]adjustment->value to relocate the canvas.

2001-10-31 Anders Carlsson <andersca@gnu.org>

* configure.in: Up version.

2001-10-30 jacob berkman <jacob@ximian.com>

* libgnomecanvas/libgnomecanvas-2.0.pc.in (Cflags):

* libgnomecanvas/Makefile.am (libgnomecanvasincludedir): use libgnomecanvas-2.0 rather than gnome-2.0

2001-10-29 jacob berkman <jacob@ximian.com>

* configure.in: drop the 2 from the package name, set GETTEXT_PACKAGE

* acconfig.h: set GETTEXT_PACKAGE

2001-10-29 Michael Meeks <michael@ximian.com>

* configure.in: depend on the latest gtk+ and pango.

2001-10-26 Michael Meeks <michael@ximian.com>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_size_allocate): fix changed emission similarly.

2001-10-26 Michael Meeks <michael@ximian.com>

* glade/glade-canvas.c (glade_module_register_widgets): register the canvas widget with the new API.

2001-10-26 Arjan J. Molenaar <A.J.Molenaar@xirion.nl>

* libgnomecanvas/gnome-canvas.c (scroll_to): fix obscure adjustment / layout handling to stop re-draw issues.
(gnome_canvas_set_pixels_per_unit),
(gnome_canvas_set_scroll_region): ditto.

2001-10-24 jacob berkman <jacob@ximian.com>

- * glade/glade-canvas.c: moved from libglade/glade/
- * configure.in: add libglade checks
- * Makefile.am (SUBDIRS): build glade/

2001-10-23 Federico Mena Quintero <federico@ximian.com>

- * libgnomecanvas/gnome-canvas.c (gnome_canvas_request_redraw_uta): Check that the widget is drawable before queueing a redraw.

2001-10-22 Havoc Pennington <hp@redhat.com>

- * libgnomecanvas/gnome-canvas-rich-text.c:
#define GTK_TEXT_USE_INTERNAL_UNSUPPORTED_API so we don't barf on including the internal headers.

- * libgnomecanvas/gnome-canvas-rich-text.h: Get gtktextlayout.h out of the header. gtktextlayout.h is not public.

2001-10-08 Stanislav Visnovsky <visnovsky@nenya.ms.mff.cuni.cz>

- * configure.in: Added "sk" to ALL_LINGUAS.

2001-10-04 Matt Wilson <msw@redhat.com>

- * libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_point): free the iter when we're done, plugs a leak.

Tue Sep 25 23:00:43 2001 Jonathan Blandford <jrb@redhat.com>

- * libgnomecanvas/gnome-canvas-rich-text.c (gnome_canvas_rich_text_draw): modify to match change in gtk_text_layout_draw. Arbitrarily chose GTK_WIDGET (item->canvas)->style->text_gc[GTK_STATE_NORMAL] to be the cursor_gc.

2001-09-26 Anders Carlsson <andersca@gnu.org>

- * configure.in: Up version to 1.104.0

2001-09-25 Matt Wilson <msw@redhat.com>

- * libgnomecanvas/gnome-canvas-line.c (get_bounds): if there are no coordinates, the bounding box is 0,0,0,0. Fixes segfault when points have not been set up yet.

2001-09-24 Matt Wilson <msw@redhat.com>

- * libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_class_init): revert property change, the real bug is: (gnome_canvas_text_set_property): here.

2001-09-24 Matt Wilson <msw@redhat.com>

- * libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_set_font_desc): free text->font_desc, not font_desc.

2001-09-24 Matt Wilson <msw@redhat.com>

- * libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_class_init): changed the

GValue type from `g_param_spec_int` to `g_param_spec_enum` for the weight property, thus matching pango.

2001-09-21 jacob berkman <jacob@ximian.com>

- * `libgnomecanvas/gnome-canvas-pixbuf.c` (`gnome_canvas_pixbuf_init`): correctly initialize `priv->anchor` to `GTK_ANCHOR_NW` (like we say the default is)

Tue Sep 18 17:19:41 2001 Owen Taylor <otaylor@redhat.com>

- * `libgnomecanvas/gnome-canvas-text.[ch]`: Changes to match new `PangoFontDescription` API and to take advantage of the ability for `PangoFontDescription` to be "unset" for all attributes now.

- * `libgnomecanvas/gnome-canvas-rich-text.c`: Fix for new `PangoFontDescription` API.

2001-09-20 Frank Belew <frb@ximian.com>

- * `configure.in`: removed `AM_CONDITIONAL(FALSE...)`, both of them

2001-09-18 Anders Carlsson <andersca@gnu.org>

- * `COPYING.LIB`: Add this file.

- * `Makefile.am` (`EXTRA_DIST`): Add `COPYING.LIB`

2001-09-15 Alexander Larsson <alla@lysator.liu.se>

- * `libgnomecanvas/gnome-canvas-text.c` (`gnome_canvas_text_set_property`): Always call `gnome_canvas_item_request_update` (`item`)

2001-09-14 Alexander Larsson <alla@lysator.liu.se>

- * `libgnomecanvas/gnome-canvas-pixbuf.c` (`gnome_canvas_pixbuf_render`): Use `NEAREST` scaling to be consistent with the rotated case.

2001-09-13 Havoc Pennington <hp@redhat.com>

- * `autogen.sh` (`srcdir`): remove more `CERTIFIED_GNOMIE` bullshit, George didn't shovel it all. ;-)

Tue Sep 04 16:42:30 2001 George Lebl <jirka@5z.com>

- * `configure.in`: remove `CERTIFIED_GNOMIE` bullshit

2001-09-13 Alex Larsson <alexl@redhat.com>

- * `libgnomecanvas/gnome-canvas-pixbuf.c` (`gnome_canvas_pixbuf_render`): Use `gdk-pixbuf` to render `pixbufs` when `affine` is `rectilinear`.

2001-09-12 Jonathan Blandford <jrb@redhat.com>

- * `libgnomecanvas/gnome-canvas.c` (`gnome_canvas_init`): change `dither` to be `MAX`.

2001-09-11 Anders Carlsson <andersca@gnu.org>

- * `libgnomecanvas/gnome-canvas-rich-text.c` (`gnome_canvas_rich_text_add_tag`): `#if 0` out unused function.

2001-09-10 Frank Belew <frb@ximian.com>
* libgnomecanvas/Makefile.am: remove -Wno-unused since it is GCC only

2001-09-10 Alex Larsson <alex1@redhat.com>

* libgnomecanvas/libgnomecanvas/libgnomecansvastypes.c (gnome_canvas_points_get_type):
Update to new g_boxed_type_register_static() API

2001-09-06 Anders Carlsson <andersca@gnu.org>

* libgnomecanvas/libgnomecanvas-2.0.pc.in (Cflags): Change includedir to be
gnome-2.0/ instead of gnome/2/

* libgnomecanvas/Makefile.am (libgnomecansvincludedir): Change includedir to be
gnome-2.0/ instead of gnome/2/ and moved libgnomecanvas.h into
libgnomecanvas/

2001-09-04 Richard Hult <rhult@codefactory.se>

* configure.in: Bumped version number to 1.103.0.

2001-09-04 Anders Carlsson <andersca@gnu.org>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_init): Disable gtk+ double buffering
since the canvas does its own.

2001-09-03 Abel Cheung <maddog@linux.org.hk>

* configure.in: Added zh_TW to ALL_LINGUAS.

2001-09-02 Anders Carlsson <andersca@gnu.org>

* libgnomecanvas/gnome-canvas-text.c: (gnome_canvas_text_init),
(gnome_canvas_text_destroy), (gnome_canvas_text_set_property),
(gnome_canvas_text_render):
* libgnomecanvas/gnome-canvas-text.h:
Make C++ safe by replacing "private" with "priv".

Fri Aug 31 04:30:27 2001 George Lebl <jirka@5z.com>

* libgnomecanvas/gnome-canvas-rich-text.c: Adapt to new GtkTextBuffer API changes,
and fix switch statement warnings

2001-08-27 Michael Meeks <michael@ximian.com>

* libgnomecanvas/gnome-canvas-pixbuf.c (gnome_canvas_pixbuf_class_init),
(gnome_canvas_pixbuf_set_property, gnome_canvas_pixbuf_get_property),
(compute_viewport_affine): kill duff x_set / y_set things:
totally broken. Now pixbufs position correctly. The _set thing
only makes sense for width / height.

2001-08-27 Michael Meeks <michael@ximian.com>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_request_redraw_uta):
fix strange rendering bug - split out
(get_visible_region): this.
(gnome_canvas_request_redraw): use it here too.
Redrews after zooming are strangely broken as well; doh.

* libgnomecanvas/Makefile.am: fixup marshal generation to be less broken, from Darin's work.

2001-08-27 Michael Meeks <michael@ximian.com>

* demos/canvas-primitives.c (key_press): flag when we handle a keypress so focus works.

2001-08-27 Michael Meeks <michael@ximian.com>

* configure.in: find glib-genmarshal

Wed Aug 15 11:55:09 2001 Tim Janik <timj@gtk.org>

* configure.in: require automake 2.13.

2001-08-25 Darin Adler <darin@bentspoon.com>

* libgnomecanvas/Makefile.am: Remove excessive -I options.

2001-08-25 Darin Adler <darin@bentspoon.com>

* demos/Makefile.am: Remove excessive -I options.
* demos/canvas-primitives.c: Change one include to work without a special -I option.

2001-08-21 Anders Carlsson <andersca@gnu.org>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_button): if there's an active pointer grab, dispatch the event even if the window is different. fixes stuck grabs when using dnd from canvas items. (Taken from a patch to stable gnome-libs which Chris Toshok did)

Wed Aug 15 12:54:58 2001 Tim Janik <timj@gtk.org>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_class_init): fix signal creation by announcing GnomeCanvasBuf* argument as G_TYPE_POINTER, since it's not wrapped as a boxed type.

2001-08-14 Martin Baulig <baulig@suse.de>

* libgnomecanvas/gnome-canvas-rich-text.h (GnomeCanvasRichText): Privatized all the fields.

2001-08-14 Martin Baulig <baulig@suse.de>

Released libgnomecanvas 1.102.0 "Roswell".

* configure.in: Bumped version number to 1.102.0.

2001-08-14 Darin Adler <darin@bentspoon.com>

Roll in some more desirable fixes from the stable branch.

2001-02-11 Rusty Conover <rconover@zootweb.com>

* gnome-canvas-line.c (gnome_canvas_line_set_arg): Added fix for when the color of a line changes the SVP's of the arrowheads also change color. They didn't change color before.

2000-05-01 Iain Holmes <ih@csd.abdn.ac.uk>

* gnome-canvas-widget.c (gnome_canvas_widget_render)
(gnome_canvas_widget_draw): New functions to queue a widget redraw
when the item is redrawn.
(gnome_canvas_widget_class_init): Connect the render and draw
functions to the item.

2000-02-15 Federico Mena Quintero <federico@helixcode.com>

* gnome-canvas-line.c (get_points): New function to copy the list
of the line's points without the endpoint adjustments for
arrowheads. Based on a patch by Rusty Conover <rconover@zootweb.com>.
(gnome_canvas_line_get_arg): Use get_points().

2001-08-13 Darin Adler <darin@bentspoon.com>

Roll in some desirable fixes from the stable branch:

2000-05-05 Miguel de Icaza <miguel@helixcode.com>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_new_aa): New policy. Most of the
problems on the gnome-canvas-aa can be fixed. So instead of
scaring off people with the AA canvas, we will address their needs
as the bug reports arrive.

Discussed this with Federico today.

2000-04-23 Iain Holmes <ih@csd.abdn.ac.uk>

* libgnomecanvas/gnome-canvas.c (item_post_create_setup): Redraw +1 pixel on both
x and y axis.
(redraw_if_visible): Same
(gnome_canvas_item_show): Same
(gnome_canvas_item_hide): Same

2000-02-15 Federico Mena Quintero <federico@helixcode.com>

* libgnomecanvas/gnome-canvas.c (uta_union_clip): New function to create the
union of two microtile arrays while clipping the result to a given
rectangle. This is based on a wonderful problem analysis and
patch by Michael Meeks <michael@helixcode.com>. He deserves a
beer.
(gnome_canvas_request_redraw_uta): Use uta_union_clip(). Now we
only queue redraws of microtile arrays clipped against the canvas
visible area. This *is* the right thing to do.
(gnome_canvas_set_pixels_per_unit): No longer clear the redraw
area before scrolling/thawing. This hack can rest in peace now.

2000-02-15 Christopher James Lahey <clahey@helixcode.com>

* libgnomecanvas/gnome-canvas.c (emit_event): Fixed a bug where GDK_FOCUS_CHANGE
events weren't being dispatched properly.

2000-01-06 Federico Mena Quintero <federico@helixcode.com>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_group_bounds): Do update the child
pointer when we walk the list. Thanks to Richard Hult for
pointing this out.

2001-08-13 Darin Adler <darin@bentspoon.com>

- * libgnomecanvas/gnome-canvas.h:
- * libgnomecanvas/gnome-canvas.c: (gnome_canvas_item_grab):
Use GDK's grab constants, not the raw ones from X.

2001-08-13 Darin Adler <darin@bentspoon.com>

- * libgnomecanvas/Makefile.am: Generate marshal files.
- * libgnomecanvas/.cvsignore: Ignore generated marshal files.
- * libgnomecanvas/gnome-canvas-marshall.list: New file with the one marshal we need.

- * libgnomecanvas/gnome-canvas.h: Add gnome_canvas_set_dither and
gnome_canvas_get_dither from the stable branch. Add signals to
allow control of background. Remove obsolete
gnome_canvas_group_child_bounds.
- * libgnomecanvas/gnome-canvas.c: Remove obsolete gnome_canvas_group_child_bounds.
(gnome_canvas_class_init): Set up new signals.
(gnome_canvas_init): Set up default dither.
(paint): Use the new render_background and draw_background signals
to paint the background.
(gnome_canvas_draw_background): New default handler for
draw_background signal.
(gnome_canvas_set_dither), (gnome_canvas_get_dither): Added.

- * libgnomecanvas/gnome-canvas-line.c: (gnome_canvas_line_set_property),
(gnome_canvas_line_update): Removed OLD_XFORM code.

- * libgnomecanvas/gnome-canvas-rich-text.c: Fix a lot of warnings.
(gnome_canvas_rich_text_render): Do a g_warning instead of just
quietly not drawing anything for the antialiased case.

- * libgnomecanvas/gnome-canvas-text.c: (recalc_bounds): Remove use of obsolete
gnome_canvas_group_child_bounds.
- * libgnomecanvas/gnome-canvas-widget.c: (recalc_bounds): Remove use of obsolete
gnome_canvas_group_child_bounds.

2001-08-12 Joe Shaw <joe@ximian.com>

- * libgnomecanvas/gnome-canvas-rich-text.c: Clean up the #includes. Change
references to g_signal_connect_data() to g_signal_connect(). Remove
the remainder of the test code.

2001-08-12 Joe Shaw <joe@ximian.com>

- * libgnomecanvas/gnome-canvas.c (gnome_canvas_class_init): Reference the correct
function pointer in the class structure when creating signals for
the various event types.

2001-08-11 Martin Baulig <baulig@suse.de>

- * libgnomecanvas/Makefile.am: Added gnome-canvas-rich-text.[ch].
- * libgnomecanvas/libgnomecanvas.h: #include <libgnomecanvas/gnome-canvas-rich-text.h>.
- * libgnomecanvas/gnome-canvas-rich-text.c (main): Removed, moved it into the canvas_de

2001-08-11 Martin Baulig <baulig@suse.de>

- * libgnomecanvas/gnome-canvas-rich-text.[ch]: Added Joe Shaw's editable canvas text.

2001-08-11 Martin Baulig <baulig@suse.de>

* demos/canvas-rich-text.c: New file.

* demos/canvas.c: Added the rich text demo

Thu Jun 28 14:07:57 2001 Jonathan Blandford <jrb@redhat.com>

* demos/canvas-primitives.c (setup_curves): ifdefed out dead code to make build with -Werror.

2001-08-11 Martin Baulig <baulig@suse.de>

* configure.in: Bumped version number to 1.96.2.

2001-08-06 Michael Meeks <michael@ximian.com>

* Version 1.96.1

2001-08-06 Michael Meeks <michael@ximian.com>

* configure.in: use GLIB_GNU_GETTEXT, depend on a recent libart_lgpl.

* Makefile.am: kill intl.

2001-07-31 Michael Meeks <michael@ximian.com>

* libgnomecanvas/configure.in: Version 1.96.1

2001-07-30 Michael Meeks <michael@ximian.com>

* libgnomecanvas/gnome-canvas-widget.c (gnome_canvas_widget_class_init): upd. (gnome_canvas_widget_translate): kill.

* libgnomecanvas/gnome-canvas-line.c (gnome_canvas_line_translate): kill. (recalc_bounds): ditto.

* libgnomecanvas/gnome-canvas.c (gnome_canvas_request_update): impl using a virtual method. (gnome_canvas_request_update_real): impl here. (gnome_canvas_class_init): hook up here.

* libgnomecanvas/gnome-canvas.h (GnomeCanvasClass): Remove deprecated 'translate' virtual method.

* libgnomecanvas/gnome-canvas.c: kill OLD_XFORM code around the place.

2001-07-14 Martin Baulig <baulig@suse.de>

* configure.in: Use PKG_CHECK_MODULES.

2001-07-13 Darin Adler <darin@bentspoon.com>

* configure.in: Remove duplicate macros.

2001-07-11 Lauris Kaplinski <lauris@ximian.com>

* libgnomecanvas/gnome-canvas-rect-ellipse.c (gnome_canvas_ellipse_update): Create 4-segment bpath instead of 90-segment vpath

* libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_ensure_gdk_points): New function (gnome_canvas_shape_update_gdk): Fixed bug allocating as many points as there was bpaths, use dynamic growing instead. Also fixed adding open paths to wrong list and drawing as polygon

* libgnomecanvas/gnome-canvas-shape-private.h: Added len_points member to Gdk structure

2001-07-07 Christian Rose <menthos@menthos.com>

* configure.in: Added sv to ALL_LINGUAS.

2001-07-04 Michael Meeks <michael@ximian.com>

* libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_class_init): s/GTK_TYPE_PANGO_FONT_DESCRIPTION/PANGO_TYPE_FONT_DESCRIPTION/

Mon Jul 2 06:53:24 2001 Tim Janik <timj@gtk.org>

* libgnomecanvas/gnome-canvas.c: s/shutdown/dispose/ according to recent GObject changes.

2001-06-28 Michael Meeks <michael@ximian.com>

* libgnomecanvas/gnome-canvas-path-def.c (gnome_canvas_path_def_closepath): fix a broken assumption that realloc will not move the memory.

2001-06-28 Michael Meeks <michael@ximian.com>

* demos/canvas.c (main): make -leference link.

2001-06-28 Cody Russell <bratsche@gnome.org>

* libgnomecanvas/gnome-canvas-text.c: #include <string.h> to avoid warning.

Tue Jun 26 12:49:35 2001 Tim Janik <timj@gtk.org>

* libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_destroy): only free text->private->bitmap.buffer if text->private!=NULL, as a comment in this function says, ::destroy may be run multiple times.

Tue Jun 26 12:14:31 2001 Tim Janik <timj@gtk.org>

* libgnomecanvas/libgnomecanvas-2.0.pc: add missing -I include directive in CFlags, so third-party code compiles.

* libgnomecanvas/gnome-canvas-shape.c (gnome_canvas_shape_point): put a on-shot FIXME warning here for shape->priv->fill_set == TRUE && shape->priv->fill_svp == NULL and avoid segfaulting in user-code.

Tue Jun 26 11:29:54 2001 Tim Janik <timj@gtk.org>

* libgnomecanvas/libgnomecanvas-2.0.pc.in (Requires): fix deps, we actually require pangoft2 and not libgnome-2.0.

2001-06-26 Fatih Demir <kabalak@translator.org>

* configure.in: Added ta to the languages list.

2001-06-25 Rusty Conover <rconover@bangtail.net>

* libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_destroy, gnome_canvas_text_init): Added code to handle cached Pango text bitmaps.

* libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_set_property: Added code to mark the cached Pango bitmap of the text as dirty causing it to be rerendered the next time the item's render method is invoked.

* libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_render): A bunch of changes:

First, a change to allow caching of Pango's rendering of the text so it need not be rerendered everytime. This makes rendering large amounts of text much faster in AA mode.

Second, the method of clipping of text was changed so that the Pango's rendering buffer is sized the same as the clip rectangle if enabled. If clipping is enabled an offset is also applied to the text's rendering to reflect the anchor of the clipping rectangle.

Third, I made the item respect the anchor argument in AA mode and be generally more sane with its positioning as pointed out by Tim Janik <timj@gtk.org>. Also made the item respect the anchor offset parameters. Neither of these properties were getting their proper respect, but I think they are a little bit closer to working correctly now, maybe.

* libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_point): Changed this method in attempt to make it actually function. It seems to work better now.

* libgnomecanvas/gnome-canvas-text.h: Added GnomeCanvasTextPrivate which is a private structure to store the cached rendering of the text done by Pango. This speeds up the rendering method significantly for large amounts of text. Since the text need not be rerasterized by Pango since it is cached; only the item rgba affine need be applied to the cached bitmap.

2001-06-25 Jens Finke <jens@gnome.org>

* libgnomecanvas/gnome-canvas-bpath.h, gnome-canvas-clipgroup.h, gnome-canvas-line.h, gnome-canvas-path-def.h, gnome-canvas-pixbuf.c, gnome-canvas-polygon.h, gnome-canvas-rect-ellipse.h, gnome-canvas-shape-private.h, gnome-canvas-shape.h, gnome-canvas-text.h, gnome-canvas-widget.h: Removed deprecated includes, use G_BEGIN_DECLS instead of GNOME_BEGIN_DECLS. Prefixed package headers with libgnomecanvas/ where they get included.

2001-06-20 Rusty Conover <rconover@bangtail.net>

* libgnomecanvas/This is the start of the changes to convert most shape items to using GnomeCanvasShapeItem, which is essentially a Bezier path item. Now shapes will only need to construct bezier paths and inherit the rest of the behavior from the GnomeCanvasShapeItem.

- * libgnomecanvas/gnome-canvas-shape.h gnome-canvas-shape-private.h
gnome-canvas-shape.c: Added for implmenation of
GnomeCanvasShapeItem which is a generic Bezier path item, but
allows easy subclassing for shapes.
- * libgnomecanvas/gnome-canvas-bpath.[c|h]: Moved this object to using the
GnomeCanvasShapeItem. Removed a bunch of duplicate code.
- * libgnomecanvas/gnome-canvas-polygon.[c|h]: Modified this object to use the
GnomeCanvasShapeItem. Again removed a bunch of duplicate code
eliminated since it is implemented in the shape item.
- * libgnomecanvas/gnome-canvas-rect-ellipse.[c|h]: Modified this object to use the
GnomeCanvasShapeItem.
- * libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_set_properties): Fixed
the stipple parameters handling.
- * libgnomecanvas/gnome-canvas-bpath-private.h: Removed as it is no longer used.
- * libgnomecanvas/libgnomecanvas.h: Added gnome-canvas-bpath.h to the list of
default includes since bpaths are quite popular.
- * libgnomecanvas/Miscellaneous makefile fixes so that the module passes make
distcheck.

2001-06-20 Rusty Conover <rconover@gnome.org>

- * demos/canvas-primitives.c (setup_curves): Added initial bpath test,
which causes some errors in gdk mode so it is currently disabled.
This is a good test case for fixing the breakage since it is only
caused in gdk mode rather than aa canvas.

2001-06-19 HÃ©ctor GarcÃ­a Alvarez <hector@scouts-es.org>

- * configure.in: added "es" for Spanish to \$ALL_LINGUAS

2001-06-18 Cody Russell <bratsche@gnome.org>

- * libgnomecanvas/gnome-canvas.[ch]: Added some new signals to GnomeCanvasItem.

2001-06-17 Lauris Kaplinski <lauris@ximian.com>

- * libgnomecanvas/gnome-canvas-path-def.c (gnome_canvas_path_def_copy): Free dst->bpath
only for non-static paths.
Lots of typo and other small fixes for inline docs

2001-06-17 <rconover@gnome.org>

- * libgnomecanvas/gp-path.c gp-path.h: Removed since they are now replaces with
gnome-canvas-path-def.c and gnome-canvas-path-def.h. Applied this
renaming change to the rest of the module and removed the
appropriate files from cvs.

2001-06-16 Rusty Conover <rconover@gnome.org>

- * libgnomecanvas/gnome-canvas-text.c (gnome_canvas_text_set_property): Got the
text item to play nicely with Pango to render text in AA mode.

Just a simple change of a gchar * to a PangoLanguage *.

2001-06-16 Cody Russell <bratsche@gnome.org>

* libgnomecanvas/gnome-canvas-clipgroup.[ch]: Installed.

2001-06-13 Martin Baulig <baulig@suse.de>

* libgnomecanvas/Makefile.am: Install libgnomecanvas.h in '\$(includedir)/gnome/2' to be consistent with Bonobo.

* libgnomecanvas/libgnomecanvas.h: You now use #include <libgnomecanvas.h> to get this

2001-06-11 Cody Russell <bratsche@gnome.org>

* libgnomecanvas/gnome-canvas-rect-ellipse.c: Don't cast the RectEllipse to GtkWidget. item->canvas instead. I think this will be correct.

* libgnomecanvas/gnome-canvas-text.c: Fix some weird Pango issues with gnome_canvas_text_set_property ().

2001-06-11 Cody Russell <bratsche@gnome.org>

* libgnomecanvas/Makefile.am: Updates for GnomeCanvasBpath.

* libgnomecanvas/gnome-canvas-pixbuf.c: Fixed some weird switch/enum warnings by adding default: tag to the switch.

* libgnomecanvas/gnome-canvas-text.c: Fixed some weird switch/enum warnings by adding default: tag to the switch.

* libgnomecanvas/gnome-canvas-widget.c: Fixed some weird switch/enum warnings by adding default: tag to the switch.

* libgnomecanvas/gnome-canvas-bpath.[ch]: Added.

* libgnomecanvas/gnome-canvas-bpath-private.h: Added.

* libgnomecanvas/gp-path.[ch]: Added. (possibly temporarily).

2001-06-11 Cody Russell <bratsche@gnome.org>

* demos/canvas-primitives.c: #include <strlen.h>

2001-06-04 Fatih Demir <kabalak@gtranslator.org>

* configure.in: Added tr to the languages list.

2001-06-02 Pablo Saratxaga <pablo@mandrakesoft.com>

* configure.in: Added Azeri and Walloon to ALL_LINGUAS

2001-05-30 Christophe Merlet <redfox@eikonex.org>

* configure.in: Added fr to \$ALL_LINGUAS.

2001-05-21 Joe Shaw <joe@ximian.com>

* libgnomecanvas/gnome-canvas.c (emit_event): Use the focused item if we are emitting a GDK_FOCUS_CHANGE event so that the proper item is passed

to the signal emission. Matches behavior on the stable branch (rev 1.93.4.6).

2001-05-21 Joe Shaw <joe@ximian.com>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_item_grab_focus): Emit a GDK_FOCUS_CHANGE event in the newly focused canvas item. Matches behavior on the stable branch (rev 1.93.4.7).

2001-05-18 Joe Shaw <joe@ximian.com>

* libgnomecanvas/gnome-canvas.c (gnome_canvas_key): Remove an assertion that prevents events (notably key events) from getting to the canvas item. Matches behavior on the stable branch.

2001-05-06 ERDI Gergo <cactus@cactus.rulez.org>

* libgnomecanvas/gnome-canvas-text.[ch]: new 'scale' property that does post-font-size-setting scaling of font size

2001-05-05 ERDI Gergo <cactus@cactus.rulez.org>

* libgnomecanvas/gnome-canvas-text.[ch]: new properties:
text_markup: the text of the canvas item, with inline Pango markup tags
attributes: A read/writeable Pango attribute list of the rendered text

style, variant, weight, stretch, size, size_points: atomic font properties
style_set, variant_set, weight_set, stretch_set, size_set: toggles usage of font parameters on a per-parameter basis

underline, strikethrough, rise: atomic attribute elements
underline_set, strikethrough_set, rise_set: toggles usage of attribute elements on a per-element basis

2001-04-29 Martin Baulig <baulig@suse.de>

* libgnomecanvas/libgnomecanvastypes.c (libgnomecanvas_init): Removed.
(gnome_canvas_points_get_type): New function.

* libgnomecanvas/libgnomecanvas.h (GNOME_TYPE_CANVAS_POINTS): #define this to gnome_canvas_points_get_type().

* libgnomecanvas/libgnomecanvas-boxed.defs: Removed.

* libgnomecanvas/Makefile.am: Don't create the type stuff from gnome-makeenums.pl and gnome-maketypes.awk.

2001-04-29 Martin Baulig <baulig@suse.de>

* configure.in: Don't check for gnome-maketypes.pl and gnome-maketypes.awk and make-inline-pixbufs.

2001-04-21 Kjartan Maraas <kmaraas@gnome.org>

* configure.in: Added nn and no to ALL_LINGUAS.

2001-04-19 Michael Meeks <michael@ximian.com>

- * libgnomecanvas/gnome-canvas.c (gnome_canvas_item_shutdown): this has to be capable of being called twice, for whatever reason. stop xform being double freed.

2001-04-19 Michael Meeks <michael@ximian.com>

- * configure.in: remove GTK_VERSION check.

2001-04-18 Michael Meeks <michael@ximian.com>

- * libgnomecanvas/libgnomecanvastypes.c (libgnomecanvas_types_init): rename to (libgnomecanvas_init): this.
- * libgnomecanvas/Makefile.am: remove libgnomecanvas-init.c
- * libgnomecanvas/libgnomecanvas-init.c: move into libgnomeui/gnome-canvas-init.c
- * libgnomecanvas/libgnomecanvas.h: strip out gnome-program cruft.
- * libgnomecanvas/Makefile.am: remove libgnomebase bits. (libgnomecanvas_2_la_SOURCES): add internal header:
- * libgnomecanvas/gnome-canvas-il18n.h: add.

2001-04-18 Michael Meeks <michael@ximian.com>

- * configure.in: remove libgnomebase dependency.
- * *.ch]:

```
s/\#include[ \t]*<libgnomebase\/gnome-defs.h>\/;
s/BEGIN_GNOME_DECLS/G_BEGIN_DECLS/g;
s/END_GNOME_DECLS/G_END_DECLS/g;
```

2001-04-15 Martin Baulig <baulig@suse.de>

- * libgnomecanvas/libgnomecanvas-init.c (gtk_module_info): Depend on libgnomebase, not libgnome.

2001-04-15 Martin Baulig <baulig@suse.de>

- * configure.in: Depend on libgnomebase, not libgnome.

2001-04-12 Martin Baulig <baulig@suse.de>

- * libgnomecanvas/libgnomecanvas.c: Added GTK+ arg parsing code from gnome-init.c here and improved and cleaned the code a bit.
- * libgnomecanvas/libgnomecanvas.h (gtk_module_info): Added external declaration.

2001-04-12 Martin Baulig <baulig@suse.de>

- * libgnomecanvas/libgnomecanvas.h: #include all of the canvas header files.
- * libgnomecanvas/libgnomecanvas-init.c: Initialize GTK+.

2001-04-12 Martin Baulig <baulig@suse.de>

- * libgnomecanvas/libgnomecanvas-init.c: New file.
(libgnomecanvas_module_info): New global variable; this is the 'GnomeModuleInfo' structure to initialize this module.
- * libgnomecanvas/libgnomecanvastypes.c (gnome_canvas_type_init): Renamed to libgnomecanvas_types_init().
- * libgnomecanvas/libgnomecanvas.h: Added external declaration for 'libgnomecanvas_module_info' and function prototype for libgnomecanvas_types_init().
- * libgnomecanvas/libgnomecanvas.h: New header file.
It #includes <libgnomecanvas/gnome-canvas.h> and <libgnomecanvas/gnome-canvas-util.h>.

2001-04-12 Martin Baulig <baulig@suse.de>

- * libgnomecanvas/libgnomecanvastypes.c: Migrate to GObject.

2001-04-12 Martin Baulig <baulig@suse.de>

- * demos/toroid.png: New file; moved here from gnome-libs/test-gnome.
There's a GNOME_LIBS_MODULE_SPLIT tag which points to the latest version in gnome-libs.

2001-04-12 Martin Baulig <baulig@suse.de>

- * demos/canvas-arrowhead.c (highlight_box): Use gdk_cursor_new() instead of gnome_stock_cursor_new().
- * demos/canvas-primitives.c (item_event): Use gdk_cursor_new() instead of gnome_stock_cursor_new().
(setup_text): Mark this function as G_GNUC_UNUSED.
- * demos/canvas-fifteen.c (test_win): Comment out gnome_dialog() stuff for the moment.
- * demos/canvas.c (create_canvas): Create a toplevel GtkWidget instead of using GnomeApp.
(main): Provide main() function.
- * demos/canvas_demo.h: New file.

2001-04-12 Martin Baulig <baulig@suse.de>

- * demos/Makefile.am: New file.
- * demos/canvas-arrowhead.c, canvas-features.c, canvas-fifteen.c, canvas-primitives.c, canvas.c: New files; moved here from gnome-libs/test-gnome. There's a GNOME_LIBS_MODULE_SPLIT tag which points to the latest version in gnome-libs.

2001-04-12 Martin Baulig <baulig@suse.de>

- * demos/: New directory.
- * configure.in (GTK_VERSION): AC_SUBST this to the current GTK+ version.

2001-03-24 Martin Baulig <baulig@suse.de>

- * libgnomecanvas/libgnomecanvas-boxed.defs (GnomeCanvasPoints): This is refcounted and has no init function.

- * libgnomecanvas/libgnomecanvas-2.0.pc.in: Depend on gtk+-2.0.

2001-03-24 Martin Baulig <baulig@suse.de>

- * configure.in: Removed the REBUILD alias.

2001-03-21 Martin Baulig <baulig@suse.de>

- * libgnomecanvas/maketypes.awk, makeenums.pl: Removed, we now use gnome-maketypes.awk and gnome-makeenums.pl which gets installed by libgnome-2.

- * libgnomecanvas/libgnomecanvastypes.c: Reflect latest gnome-maketypes.awk changes.

2001-03-21 Martin Baulig <baulig@suse.de>

- * configure.in: Set package name to 'libgnomecanvas2', looks better than 'libgnomecanvas-2'.

- * configure.in (GNOME_MAKETYPES, GNOME_MAKEENUMS): Check for the 'gnome-maketypes.awk' and 'gnome-makeenums.pl' scripts which are installed by libgnome-2 and AC_SUBST them.

- * configure.in: Removed the GNOME_LIBS_PACKAGE stuff.

2001-03-05 Martin Baulig <baulig@suse.de>

- * libgnomecanvas/gnome-canvas-pixbuf.[ch]: #include <libgnomecanvas/*.h> instead of <libgnome/*.h>.

- * libgnomecanvas/gnome-canvas-line.c, gnome-canvas-polygon.c: #include "libgnomecanvastypebuiltins.h".

- * libgnomecanvas/libgnomecanvastypes.c: New file.

- * libgnomecanvas/libgnomecanvas-boxed.defs: New file.

- * libgnomecanvas/libgnomecanvas-2.0.pc.in: New file.

2001-03-05 Martin Baulig <baulig@suse.de>

- * libgnomecanvas/gnome-canvas*.[ch]: Moved here from gnome-libs/libgnomeui. All files are copied directly in CVS so they contain the full history.

This is a demo version of txt2pdf v.10.1

Developed by SANFACE Software <http://www.sanface.com/>
