photoshop restoration and retouching, photographic restoration, digital photo restoration, pho

Article Body:

Photo restoration is the practice of restoring a photograph which has been spoiled or exaggera

Photo restoration may be effective in removing or masking the following defects:

- 1.Staining (such as yellowing) of the photographic document due to age and chemical reactio
- 2.Dust and hair observable on the photograph
- 3.Spots caused by bacteria or mold
- 4.Scratches or tears on the print
- 5.Discoloration of the publish due to fading

Playing around with the brightness and contrast controls will give a better restoration of pho

1. Protect what's left
2. Get it restored
3. Get two copies to avoid repetition of restoration process.
4. Share/Store the photos online

Photo Restorations can be done at FIREIA. Coming soon- Art section with online auction and Inc
