Keywords:

kidney, kidney stone, infection kidney, disease kidney, failure kidney, cancer kidney, infection kidney

Article Body:

The kidneys are bean-shaped organs in our bodies vertebrates, they are part of the urinary system.

A Human's kidneys are two organs which can be found in the posterior part of the abdomen. There are two kidneys in a human body.

An average size kidney in a human adult is approximately 11.5 cm in length and about 4.5 cm deep.

Because of the kidney's responsibility for filtering out waste in the human body there are lots of diseases that can affect the kidneys.
