Article Body:

There are cosmetic treatments available for people with any kind of hair; be it curly, straight

Permanent waving better known as perming, has been around for nearly one hundred years. Since

Suitable candidates

Perms look great on people with thick hair. Hair in good condition responds to a perm much bet

Hair care tips before perming

Tell your stylist what type of curls you want and also what you don't want. It's a good idea i

The size of the curler determines the size of the curl. A smaller curler would create a smalle

It takes one to two hours to perm hair depending upon how long your hair is and how efficient

Types of perms

1. Alkaline perms give a strong, firm curl and have an active ingredient called ammonium
2. On the other hand, acid-balanced perms are gentler and have a significantly lower ph.

Hair straightening

So you are tired of your naturally curly hair or frizzy locks and want that poker straight hair

Various treatments

1. Permanent or chemical hair straightening should be carried out by a trained, experienc
2. The thermal reconditioning process invented in Japan has excited women all over the wo
3. Ionic treatment is ideally suited for people with highlighted and colored hair. It lea
4. Hair straightening irons have ceramic-coated plates that distribute heat evenly and pr

Precautions after undergoing treatment

1. After undergoing hair straightening treatment make sure to use a mild shampoo and a de
2. Stay away from any heat-styling tools to prevent any damage to the hair.
3. Use a wide-toothed comb for the hair after the straightening treatment. A little care

Conclusion:

Cosmetic hair treatment are made possible by cutting edge hair cosmetics and other hair ca
