

Title:

Life Is As Musical As A Play

Word Count:

563

Summary:

What was the last music you listened to today? How did that music, song or melody make you feel?

There is a study that is out to discover whether brains that have been trained musically are more intelligent.

This Canadian-made study wants to discover if kids who are given early training in music has a positive effect on their intelligence.

Keywords:

musicals

Article Body:

What was the last music you listened to today? How did that music, song or melody make you feel?

There is a study that is out to discover whether brains that have been trained musically are more intelligent.

This Canadian-made study wants to discover if kids who are given early training in music has a positive effect on their intelligence.

The study has been given a grant of more than one hundred fifty thousand dollars by an organization.

The researchers who want to conduct the study believe that the human brain is extremely moldable.

The researchers hope that once it has been proven that early training in music has a positive effect on intelligence.

Previous work done that is related with this study has been conducted in Germany wherein the brain activity was measured.

This study was able to prove that musicians, believe it or not, have an enhanced auditory as well as cognitive skills.

The Canadian-made study will study children and the way their brains function as well as adults.

The children will be introduced to violin lessons as well as the piano. Both groups will be given a musical instrument.

The EEG will be used to measure any electrical change in the brain. The MEG will also be used to measure magnetic fields.

But basically, the goal of the study is to be able to find various ways and means to utilize music to improve intelligence.
