Article Body:

Is Rubber Ducky your idea of fun in the bath? Grow up! Discover the fizzle, fun and wild aroma

1. Dry Ingredients:

Citric Acid

It is a white substance like powder. Citric acid is not Vitamin C. It is the substance respons

Cornstarch

This is another powdery substance but of finer crystals. It comes from the pulverized white he

Baking soda

This is a rising agent, activated by mixing with acid. When mixed with acidic liquid like sour

2. Wet Ingredients:

Essential oil

Oils extracted from plants and responsible for the plants' odors. These are found in the pit,

Food color

Natural and synthetic dyes that can be eaten and used to color foods such as beverages, cake i

Vegetable Or Nut Oil

to hold everything together, use base oil extracted from plant sources like vegetable and nuts

3. Preperation Tools:

- Mixing Bowl
- Small cup
- Plastic Mold
- Water-proof and colorful wraps
- Ties
- Watertight containers

4. Directions:

- Sieve all dry ingredients to make sure there are no lumps formed in the mixture.
- Mix all the dry ingredients together with a fork to make sure that there is an even distribution.
- In a different bowl or a small cup, mix the wet ingredients: base oil, essential oil, and food coloring.
- Slowly add the oil mixture into the dry ingredients, making sure to mix very well as you add.
- Press the mixture onto the plastic molds. They will be hardened within 2-3 hours though allow for 24 hours to be sure.
- Wrap the balls in colorful paper and store in watertight container, in a dry area of your home.
