For many years I have been very interested in one special musical instrument: the French horn.

The French horn was created with of a long, spiral tube ending in a flaring bell, three valves

The horn (is a brass instrument Modern French horns have three valves which lower the pitch

If you are a musician you will understand the differences of a French horn with other instrume

As I mention before it is usually higher than twelve feet (for a single horn in the key of F)

The horn plays in a well high portion of its cousins in the same musical family as compared to

The problem with the French horn is how difficult it is to play, and that's why so many people

A true pity, there is nothing like the music of a good French horn.
