

Title:

What do you need to set up your own home-entertainment system?

Word Count:

324

Summary:

So if you've decided that you want to take the plunge and install a home entertainment system

Keywords:

home,entertainment,cinema

Article Body:

So if you've decided that you want to take the plunge and install a home entertainment system

The first thing you need is your `screen`: that is, either a TV or a projector. For most people

The next thing you need is the DVD player, which should be a high-quality model, not some cheap

You will also want a surround sound system, to make it seem like the sound is filling the room

Finally, silly as it might sound, a very important part of your equipment is the cables that y
