E-Government in China Soon to Be a Reality

Article Body:

Without question, the world is a big place. However, with the constant development of informat

One example is the work of China Expert Technology Inc. (OTC BB:CXTI.OB), a company that build

Analysts predict that China's e-government systems market will reach \$6.6 billion this year.

Recently, China Expert was awarded contracts worth \$52.2 million to build e-government infrast

These contracts allow the company to create unified e-platforms for each of the three cities.

There are some important implications in the creation of these e-government platforms. First,

A unified e-platform will allow the public to access, on one site, information for any issues

These sites will also lead to more Internet use by the residents of Jinjiang, Nanan and Dehua.

Finally, because the e-platforms will enable the governments of these three cities to easily e

If such platforms can be built for 150 million users in China, could the same thing be done fo
