Article Body:

As a former safety manager in petrochemical plants I am a strong believer that ALL injuries ca

I didn't always think this way. When I began as a young carpenter building scaffolding up to a

Most accidents occur from three reasons. The worker hasn't take the time to assess the situati

Let's analyze these individually. When I worked in the petrochemical plant, workers usually wo

There is never a reason to rush a job at the expense of safety. Rushing inhibits proper planni

There is never a reason not to have the proper tools and equipment to do a job. The rule is qu

These are the basic suggestions I will make to you if you want to return home with everything

Wear appropriate gloves to protect your hands from cuts, burns, and abrasions.

Wear safety glasses to prevent foreign objects from getting in your eyes.

Wear ear plugs to keep noise levels from permanently damaging your hearing.

If you are involved in work that involves heavy lifting, wear a back support.
