

Title:

A Brief Introduction To Fiber Optics Technology

Word Count:

501

Summary:

Understanding how fiber optics are made and function for uses in everyday life is an intriguing

Keywords:

fiber cables, fiber optic tester, fiber optic light source, fiber cable, lc fiber, fiber patch cable

Article Body:

Understanding how fiber optics are made and function for uses in everyday life is an intriguing

There are two kinds of fiber optics. The single-mode fiber optic is used for high speed and long

Fiber optics have a large variety of uses. Most common and widely used in communication systems

In fiber optic communication systems, lasers are used to transmit messages in numeric code by
