photo printer, photo printers, photos, photographs, hobby

Article Body:

So you have your new digital camera and clicking away to glory anything and everything in sight

Most of the printers could easily be purchased under \$500. While all of them have similar features

Many of the best photo printers today have the ability to print directly from your camera or from a computer

Now let us see the top 5 best photo printers and some of their features:

Epson Stylus Pro 4000 can take in paper wider than 11 inches thus making it very convenient. The Epson Stylus Pro 4000 is a professional grade printer that is designed for high quality printing of large format photos and documents.

Canon Pixma IP8500 Photo Printer is another best photo printer in our top 5 list. It scores very well in terms of print quality and speed.

Canon Slephy DS700 is the best photo printer in the portable category. It plugs in directly into your camera and prints photos directly from the camera's memory card.

The ever popular Epson Picture Mate is another best seller in its newest version ~ The Epson Picture Mate is a compact and portable printer that is perfect for travel and outdoor use.

Another best photo printer worth considering is the Sony PictureStation DPP-FP30. The installation and setup is very easy and the print quality is excellent.

So have fun with the best photo printer that you have selected and may your photo memories come to life.
