Article Body:

Gone are the days when you had to live with the cut and bruised skin. No cuts, no irritations

How an Electric Shaver Works

Electric shavers have a rather simple construction that attending minor things like making a s

1. A set of rechargeable battery

2. A miniature electric motor

3. A gear train system

And there are two significant things on the outside; they are the switch and the set of blades

Batteries supply power to a circuitry printed on a fiber glass board called as printed circuit

When you start, the motor powers the system of gears which are in turn connected to the blades

The rotary blades rotate closely within their respective safety cages at speeds variable in tw

Who Makes Electric Shavers and How to Buy Them

Even a visit to your near super stores can quickly answer your question. There are numerous re

Check out the features before you buy. If you are looking for just a trimmer, you need not buy
