

Title:

Fiber Optics - Bringing Us High Speed Internet

Word Count:

368

Summary:

Generally, optics is a branch of physics (science) that deals with the nature, behavior and pr

Keywords:

optics, fiber optics, optical

Article Body:

Generally, optics is a branch of physics (science) that deals with the nature, behavior and pr

The transmittance of data through fiber optics is based on the principle of total internal ref

Unlike the copper cables, there are no chances of getting electrical shocks in case of optical

Optical fibers are more resistant towards the external interference. They are lighter and thin

Apart from telecommunications, fiber optics has been a blessing in the medical and industrial

The Internet and fiber optics have become inseparable because the optical fibers facilitate hi
