Computer Desktop vs. Notebooks

Not that long ago, no one would consider using notebooks or laptops as their primary computers

But just because notebooks are more powerful, it doesn't mean that they're the right choice fo

Mac vs. PC Computers

Although Apple is gaining market share with notebooks, when it comes to a computer desktop, PC

On the other hand, if you or members of your family are avid gamers, you probably want to go w

Extras

When you're shopping for a computer desktop, you need to consider which "extras" are important

Before you make a buying decision, it's important to understand what's available in the market
