

Title:

How to start? Find a computer programming book.

Word Count:

294

Summary:

Everyone that starts to learn a programming language needs a book. Period. There's no way around

Keywords:

computer programming book

Article Body:

Everyone that starts to learn a programming language needs a book. Period. There's no way around

First of all you have to decide what to learn. That's difficult, believe me. There's TONS(!!!)

Now, were to start looking for a book? The best way is to find someone you trust and that actu

I can give you insight on some books. I like O'Reilly books, Wrox and a few others. Drop me a
