Article Body:

Why do people love MAC computers? Are they really the best choice for your home business? To

How can you tell? Well MAC computers, manufactured by Apple, run on their own operating syste

Bill Gates actually ripped off the original Apple operating system, but that's a whole other a

Most media and creative professionals, who work in design or in the film and music industries,

Now I've never owned one, but I've worked with other business owners who have and I actually f  
MAC users LOVE MACs!!!!!! They're generally like cult followers, they worship them and would d

That in itself does say a lot! You don't generally see PC users feeling the same way. I admit

The truth is MACs are essentially better-made. Apple tends to ^over-engineer~ their computers

Their operating system is superior to Windows and they have far fewer technical issues, especi

Not to mention computer hackers hate the fact that Microsoft has created a monopoly. Viruses a

Now on the other side, since there are fewer Macs in the world, not all software, especially s

So if they're so great, then why doesn't everyone own one?

Simple they are more expensive than PC's. That's the main reason why PC's are more ^popular~ p

Most businesses, especially small businesses, don't need to spend the extra bucks on a compute

But that doesn't mean you shouldn't consider one. They're really great machines and will certa
