Article Body:

Maintaining your computer is extremely important ~ especially if you are an Internet Marketer. come to a screeching halt. There are 4 important steps in which you can perform on a regular b

First line of defense, invest in quality virus software. Be it Norton AntiVirus, McAfee Virus your computer.

I personally have set Norton to run every evening. It may seem like a hassle when you're trying the action is far better than a one or two days of down time ~ and possible loss data, if your

Second line of defense, invest in ad ware software. I use Ad-Aware SE Personal ~ you can get t be going to the paid version for added protection. Anyway, Ad-Aware SE will protect your comp

A third line of defense is to always backup your data. Even though you don't want to hear this

Just a side note, when I was working in the corporate world, I had the misfortune of having a statement flashing on my screen that said ^Back up your Hard-Drive - Error~ -- than my hard-dr

Fourth line of defense and maintenance, always clean out your temporary Internet files. It us

To clear out your temporary Internet files do the following:

1. Open up your Internet connection.
2. Click On Tools, then Internet Options
3. Under the General Section you should see a section labeled ^Temporary Internet Files~
4. Click on the button that says Delete Cookies, and then the button that says Delete Files.

Within the General Section you should also see a section called History. I decrease the numbe

These simple maintenance tips can keep your computer clean and protected, which is extremely i
