blank cassette,blank cassettes,cassette tape,cassette

Article Body:

If you are looking at blank cassettes on the web, you may be very confused at the difference i

If you are using your cassette tapes to record something fast, and the life of the cassette wi

Spoken word applications are one use that requires a higher quality cassette. Going with cheap

So what are some of the differences, and what should you be looking for? The following is a li

1. The cassette shell should be held together with a five-screw design. This type of design wi

2. Using Type I tape is sufficient for spoken word applications. You still need to make sure t

3. Make sure that the felt pad that presses the tape against the head is sufficient. The large

4. Pins and rollers are also important. The rollers are what guide the tape around the corners

5. Slip sheets are the sleeves between the tape and the case. These are also important since t

As you can see from just a brief description, all blank cassettes are not created equal. There
