Article Body:

You have just invested in a new vehicle, the one of your dreams, and you take it on a trip across

What really happens during system failure?

<ul>

<li>The user is unable to do their job using the productivity tools you have provided

<li>Potentially this may affect two or more employees if their activities are linked

<li>The system failure may be enterprise wide, causing everyone down time

<li>The failure may happen at the "worst possible time". Closing date for an RFP submission, p

<li>There may be total data loss

<li>The people affected must contact the support person and explain the issue. Hopefully, the

<li>Will parts be needed?

<li>Will they need to be ordered?

<li>Will a temporary loaner be required?

<li>Will software need to be reloaded?

<li>Will software support need to be contacted?

</ul>

All of these will add to the time to resolve the problem. During this time one or more of your

What is the cost of a pro-active repair?

With an affordable investment, you will find a program of regularly scheduled preventive maint

<ul>

<li>Loss of service to user scheduled for a time of minimum requirements. <li>User can pre-pla

<li>Cost of labour at reduced prescheduled rate

<li>Cost of parts without emergency shipping costs

</ul>

Find a solid company that will provide a program of regularly scheduled maintenance visits who

There are many other advantages in this type of process that should include:

<ul>

<li>Reduces the incidence of emergency and service calls.

<li>IT service able to be budgeted for more accurately.

<li>Proactive preventive maintenance solves issues before they become problems.

<li>Reduces IT cost per user by improving system uptime and productivity.

<li>Discounted hourly rate based on a minimum site visit.

<li>Timely accounting for all work performed.

<li>Dependable and reliable tools to operate your business.

</ul>

When you invest in a tool to get your work done, you would not think of not maintaining it and
