I just read an article about a lady whose computer was deluged by adware. It was such a problem

Somewhere down the line, there will be problems with your computer (adware, spyware, viruses,

Don't spend thousands of dollars on a computer guy to fix your computer if it breaks down. The

If you are unable to access programs like MS Office and Quicken you may have a hardware problem

If you can still access your data, try the following:

First, back up all the saved data from programs like MS Office and Quicken. Make sure you have

Here is the plan.

- 1) Starting now if it is not too late, you should be saving your important files and data to a
- 2) Reload or load for the first time Windows XP Home edition or Professional.
- 3) Now download for FREE Microsoft Defender Anti-Spyware from microsoft.com.
- 4) Now download for FREE Avast Anti-virus.

These three work great together. You can find great information on in the free stuff forum at

I even suggest for older computers that are running sluggishly to load Windows XP right now to

I did the above on 2 older Dells. One was plagued by an overload of junk and adware that poppe

Disclaimer: I am not an expert on any of the above, but I did sleep at a Holiday Inn last night
