

Title:

Spyware Protection through Lowest User Access

Word Count:

581

Summary:

Many of the computers that are attached to the Internet are infected with some sort of Spyware

Keywords:

Article Body:

Many of the computers that are attached to the Internet are infected with some sort of Spyware

There is a simple measure you can take to prevent these programs from being able to access you

By default most home computers only ever have one user account created and that is the account

Why is this fact being mentioned, well it's because this is the main cause of Spyware and Viru

There is no valid reason for the majority of users to ever need Administrator privileges to pe
