Article Body:

The internet is a growing and dynamic entity. Growing in exponential rate everyday and changing

Is it worth it to switch to broadband service? As most things are, it depends on you're situat

Back to the question. What really helps in deciding if switching to broadband is a must. Is tr

If you're using the internet for:

- checking and sending e-mail
- chatting (without video)
- surfing for text based information

Then switching to broadband is a waste of money. like most people, they just use the internet

If you're using the internet for:

- Downloading movies and music
- Watching streaming videos
- Chatting with video and voice
- Playing online games

Just like me. I use the internet for online games, checking my websites, downloading music and

To conclude. The internet is becoming the wave of the future. Easy access to information and s
