With the price of T1 service dropping from it's high point of roughly 20 years ago, it's no wo

But where do you find an appropriate provider that offers a great price and support?

This is a great question. The biggest mistake is to base a purchasing decision on price alone.

When making this important decision to build up (or out) your communications infrastructure, a

a. If you're looking for a voice T1 service, what are your current requirements? (local/long d

b. If you're looking for a data T1 service, what is your objective? Web hosting, internet acce

c. If you're looking for an integrated solution (voice and data) consider both points above.

Obviously these are some general considerations. There are also cost factors, time lines to im

Whether you have an in-house technical staff or not, whatever provider you choose for service

So, how exactly do you find an objective third party to help you understand requirements, cost

A communications broker provides an objective look at your unique situation. Communication bro

There are many T1 providers out there. Do yourself and your business a favor and use a communi
