The system we will mention here is the Oracle Database 10g Products. These are, believe it or not,

- Enterprise Edition: Packed full with the highest level of performance and scalability. You will
- Standard Edition: Clustering support is provided with this 4 processor version.
- Standard Edition One: Same great stuff with a 2 processor version that is perfect for the enterprise
- Personal Edition: Perfect for an individual
- Lite Edition: Great option for managing mobile database applications.

While the features of each of these Oracle database options are many, it makes sense for each
