

Title:

Tips For Buying A Laptop

Word Count:

574

Summary:

Laptop computers are essential tools for college students, business professionals and many more.

The first decision to consider when buying a laptop is whether you need a Windows, Apple or Linux.

Keywords:

laptop

Article Body:

Laptop computers are essential tools for college students, business professionals and many more.

The first decision to consider when buying a laptop is whether you need a Windows, Apple or Linux.

Assuming you know what operating system you are looking for, the next step is to set a budget.

If you don't think you need all the bells and whistles of a brand new system, buying a used system is a good option.

Once you have set your budget, determine the minimum memory configuration. I'd highly recommend at least 4GB of RAM.

Once you have your memory needs and budget set, you can start to compare models for weight, ergonomics, and screen size.

Many people are excited by the larger screened laptops, but fail to fully appreciate the impact on portability.

Finally, there are networking considerations. By now, it does not make a lot of sense to purchase a laptop without wireless capabilities.
