

Title:

Video Phones: A New Era Of Communication

Word Count:

364

Summary:

A videophone can be defined as a telephone, which has a viewing screen and a built-in camera.

Keywords:

Videophones

Article Body:

A videophone can be defined as a telephone, which has a viewing screen and a built-in camera.

How To Use A Videophone

Using a videophone is a cinch. A videophone looks just like a normal phone with camera and built-in microphone.

Some telecommunications providers and cable companies offer ISDN services. Due to high availability, ISDN is becoming a popular choice for businesses and individuals alike.

Use Of Videophones By Deaf Persons

Videophones are the result of recent advancements in the telecommunication field. This is a very exciting development for deaf persons, as it allows them to communicate with others in a more natural and effective way.
