

Title:

Why Are Laptop Batteries So Bad?

Word Count:

421

Summary:

If you are like most people with laptops you know that they are only as portable as the nearest

Keywords:

laptop batteries

Article Body:

If you are like most people with laptops you know that they are only as portable as the nearest

So my main question for this piece is why are laptop batteries so bad? To answer this question

Well we will start with what most batteries are made of and that is Lithium Ion cells (older 1

Now it is recommended that one stores the battery at about 40% capacity and in a cool place. T

The reason why these new laptop batteries are so much more expensive than they used to be is b
