Article Body:

Whether you pick them up at a discount retailer or from a designer boutique, sunglasses are de

As wonderful as sunglasses are, all sunglasses are not of the same quality and it is important

Sunglasses come in a variety of styles and types. If fashion is your main consideration, pick

After you've found a style that you like, think about the lenses. You've probably seen sunglas

- Photochromic lenses change color depending on the amount of UV light to which they are expos

- Amber-colored lenses tend to block blue light. There is discussion about whether blue light

- Mirror-coated sunglasses limit the light that reaches your eye, which may make it easier to

- Gradient lenses, as the name implies, are those that are tinted at different opacities from

- Polarized and anti-reflection-coated sunglasses reduce the amount of reflected light reachin

Nearly every style of sunglasses, lenses and frames, can be made to accommodate special prescri
