Here are the 10 tips that I have personally used to save on my home heating costs:

1. Head down to the basement and reduce the setting on your hot water thermostat by about 10 d
2. While you are downstairs, make sure you have clean filters for your central air-heating uni
3. Check your air ducts for gaps, leaks or disconnects. If you have any disconnects or leaks i
4. Adjust your thermostat a few degrees lower. Believe me, this really adds up. It may not see
5. While we are on the subject of thermostats, consider replacing yours if it is not programma
6. Insulate your attic. Heat rises, right? If your attic isn't properly insulated, all of the
7. Find those leaks and cracks! If you were to add up all of the small cracks and holes in you
8. Close the vents in rooms that you do not use. I have one room in my house that is not curre
9. Open drapes and shades for all of your windows during the day to let the sun heat your home
10. Your fireplace can help and hurt your heating costs. If you are not using your fireplace,

Taking the time to implement these tips will drastically reduce your home heating bills. You c
