Article Body:

In Americas 230 year history the government seems to have forgotten that there job is to run to the most recent example is the Internet gambling Ban signed into law last week by President But These games are harmlessly enjoyed regularly by millions of Americans everyday, but some peoply This is not the first case of the government going against the wishes of the people, in the earn that it is not the first case of the government going against the wishes of the people, in the earn this is not the first case of the government going against the wishes of the people, in the earn this is not the first case of the government going against the wishes of the people, in the earn this is not the first case of the government going against the wishes of the people, in the earn this is not the first case of the government great example of a failed policy to protect the people is the war on drugs that the government drugs has risen, and to support their habits many drug addicts have had to commit the American prisons are packed full of people whose only crime was possession of these illegal Instead of being an industry that is regulated and controlled you have people selling these drugs are the government decided not to criminalize drugs but make it a heavily controlled industry. Please do not misunderstand me I am not in favor for legalizing hard drugs, but the current syll I choose to play some hands of blackjack or poker from the comfort of my home what rights of the conforce this ban millions if not billions of dollars of software and computer hardware will the American government needs to start re-thinking its policy of treating its citizens like sm
