When considering whether you should buy a home, heating issues are something you should take a

Heating Issues

As you inspect potential homes, heating issues should be foremost in your mind. While obvious

1. Layout ~ The layout of a home can have a major impact on both heating issues and energy bills.

A second layout issue concerns the number of stories in the residence. While a tri-level home

2. Control Areas ~ One way to reduce the heating requirements for high ceiling and tri-level homes

3. Vents ~ A more mundane, but important issue, are vent locations. In some homes, the vent locations

With new homes, one can expect to find heating issues addressed competently. With older homes,
