Article Body:

A juicer is conical-shaped kitchen utensil used for squeezing, or extracting, juice from various

Two kinds of juicers exist`a manual, or hand-operated, version and an electric version.

Manual/Hand-Held Juicer

Juicing consists of placing fruit wedges or vegetable slices cut side-down in the center of the

Electric Juicer

Electric juicers mechanically extract juice from fruits, vegetables, herbs, etc. Proper operation

Two kinds of electric juicers are on the market:

Centrifugal juicers`these consist of a blade and sieve to separate juice and pulp from rinds of

Masticating juicers`these `chew` up the entire piece of food before, or in order to, squeeze j

By the way, electric juicers and blender are different in function and purpose. Electric (masticating)

The theory is that since fast-moving mechanical parts of an electric juicer blow air into the
