

Title:

What is Wine - An Introduction to wine

Word Count:

287

Summary:

<p><B>What is wine exactly?</B>

<p>Wine has been around the world for over 7000 years and is made from just 2 basic ingredients

Keywords:

food, drink, alcohol, bar, equipment, supplies, supply, cocktails, flairing

Article Body:

<p><B>What is wine exactly?</B>

<p>Wine has been around the world for over 7000 years and is made from just 2 basic ingredients. 99% of all wine is made from the juice of the grape, although some wines do use the skin, this makes

<p><B>How is wine made?</B>

<p>Yeast is the main ingredient needed for fermentation yeast is what transforms the grapes into wine. The result however, wouldnt be very pleasant to taste.

<p>There are a number of different strains of yeasts, numbering somewhere in 1000's and the types are specifically designed for this sole purpose.

So yeast is actually a living organism that feeds off of sugars in the grape juice in a process called

<p>When fermenting, yeast spores increase in numbers exponentially, this happens until the sugars are exhausted. During this fermentation process, the sugars are converted into alcohol and carbon dioxide.

<p>There are various different flavors the yeast will lend to the finished wine product, the type of yeast and the particular strain of yeast used as well as a few other things.

<p>When all of the fermentable sugars have been exhausted the yeast then falls to the bottom of the container. The wine is removed, leaving the yeast, and is transferred to another container to mature to allow
