Article Body:

`Sugar` might as well be a four-letter word the way science and pseudo-science has demonized it.

A scientific field called glycoscience and/or glycobiology disagrees with much of the popular

`Glyco` is derived from the Greek word `sweet` and refers to monosaccharides or sugars. For de

Glycoscience is amassing more and more evidence that the role of carbs is crucial to maintaini

Recent scientific evidence is showing that these sugars and carbs help us on a cellular level.

Human beings, from a purely biological standpoint, have not really changed in thousands of year

Now although most people would agree with that statement, most of them would heartily disagree

So the question remains, where do we get these beneficial sugars? Simple. The company is calle

When you see how many diseases are preventable simply by an alteration in diet and taking prop

Note: Glyconutrients are not intended to heal, treat, or cure any disease.
