dental, braces, dentists

Article Body:

Orthodontic technologies have greatly improved the effectiveness, comfort, and aesthetic appeal

New Choices for Traditional Braces

With traditional braces, brackets are glued to each tooth and held together by a metal loop that

These smaller, stronger components translate into fewer adjustment appointments, and ultimately

Consumer demand has also led to many cosmetic choices being made available to orthodontic patients

Invisible Braces

The latest news in orthodontics that has many people excited is the development of "invisible"

Computer technology helps the orthodontist to map out a progressive plan to properly align the teeth

Generally, each mold is worn for two weeks. They must be worn all day and all night, but can be removed

Invisible braces cost more than traditional braces, but for some, they are well-worth the extra cost

Invisible braces cannot be used to treat every case. Even if they can be tried, traditional braces
