

Title:

Birth Control Methods Don't Always Fight STDs

Word Count:

577

Summary:

Most people tend to assume that birth control methods can also be used to help prevent an infection.

Keywords:

birth control methods

Article Body:

Sexually transmitted diseases are something that should be considered a major concern whenever

Birth control pills, intrauterine devices, and the so-called Natural Family Planning (NFP) method

Spermicides are generally effective at preventing conception, but not for removing the risk of infection.

Condoms, diaphragms, and other forms of contraception that involve blocking the release of bodily

Procedures such as vasectomies and tubal ligations do not prevent STD infection, even if they
