Article Body:  
Bulimia is term used commonly for an eating disorder called Bulimia nervosa. It is a psycholog

- \* vomiting
- \* inappropriate use of laxatives, enemas, diuretics or other medication
- \* excessive exercising
- \* fasting

The following six criteria should be met for a person to be diagnosed with bulimia.

- 1) The person feels incapable of controlling the urge to binge, even during the binge itself,
- 2) The person purges him or herself of the recent intake, resorting to vomiting, laxatives, di
- 3) The person engages in such behavior at least twice per week for three months.
- 4) The person is focused upon body image and desperate desire to appear thin.
- 5) The person does not meet the diagnostic criteria for anorexia nervosa. Some anorectics may
- 6) The person is of normal weight or overweight.

Bulimia is often less about food, and more to do with deep psychological issues and profound f
