Article Body:

Anabolic-androgenic steroids are natural or synthetic substances that regulate the body function.

'Steroids' belong to the class of drugs that is available legally only by prescription, to treat various conditions.

Steroids are prescribed for treating the body wasting in the patients with AIDS and other diseases.

People can face serious health problems with the abuse of the anabolic steroids. Now-a-days, a large number of people are using anabolic steroids.

Anabolic steroids are taken orally or injected, particularly in cycles of weeks or months. Cycles are usually 4-6 weeks.

Sometimes bodybuilders, athletes, and sports persons buy steroid for using them for wrong purposes.

So, the people are advised to buy steroids only for positive use and only from the approved sources.
