Word Count:

287

Summary:

Chronic obstructive pulmonary disease or COPD is a disease that causes destruction of airways

Keywords:

chronic obstructive pulmonary disease, COPD and life expectancy, COPD medication, COPD stages

Article Body:

Chronic obstructive pulmonary disease or COPD is a disease that causes destruction of airways

In most of cases, the root cause for COPD is smoking or consumption of tobacco. Naturally, COPD

In cases where the intensity of COPD has developed beyond the initial stages, giving up smoking

In many cases, when COPD is in its final stages, even oxygen therapy may not help the patient.

If COPD is detected in a person, giving up smoking is the best way to increase life expectancy
