Word Count:

484

Summary:

You can call dbol as the ^great grandfather of all anabolic steroids~. Dr. John Ziegler's Dianabol

Keywords:

Dianabol

Article Body:

You can call dbol as the ^great grandfather of all anabolic steroids~. Dr. John Ziegler's Dianabol

Dbol is one of the most powerful anabolic steroids. It comes in pills and injectable form under the name of Dianabol.

Dbol is one of the most widely used anabolic steroids by bodybuilders and power lifters. It is said to be the most powerful anabolic steroid available.

Dbol has a great effect on protein metabolism. It effects protein synthesis, supports protein synthesis, and increases protein synthesis.

DOSES ~ Dr.Zeigler recommended dose for athletes is 5-10mgs/day. Effective dose is 25-50mgs ~

Dbol is often taken in cycles and usually stacked with various other anabolic steroids. It gives a great effect on protein metabolism.

STUDIES ~ Studies conducted on dbol in the early 80's showed that high doses of dbol (100mgs/day) increased protein synthesis.

SIDE EFFECTS ~ The some side effects associated with dbol include acne, gynecomastia, liver damage, and high blood pressure.

PRESENT STATUS ~ Dbol is presently banned by the U.S. FDA. Its production in most of Western Europe has been discontinued.
