

Title:

Dealing With Fevers And Colds

Word Count:

434

Summary:

When your baby has a fever or cold, your first urge is to run right to the pediatrician. But,

First, most doctors don't consider a fever under 100°F a fever at all, unless your baby is und

Keywords:

Baby, babies, infant, parent, mother, child

Article Body:

When your baby has a fever or cold, your first urge is to run right to the pediatrician. But,

First, most doctors don't consider a fever under 100°F a fever at all, unless your baby is und

To treat a mild fever, try keeping your baby cool, using compresses or a tepid bath. Dress her

For minor colds, the best treatment is rest. However, your child may be unable to rest comfort

Colds should resolve themselves in a week or so, but if they do not, look for signs of an ear

Talk to your pediatrician regarding his recommendations for treating colds and fevers, and whe
