99 Places Where You Need To Watch Out For Germs

Article Body:

They're lying in wait for you at the ATM machine and on your computer keyboard at work. Secret

They're germs, and they're lurking in more places than most people think, just waiting to be t

"Most people think they have a good idea of where germs are, but I think they would be surpris

Where the Germs Lurk

According to Dr. Gerba, many people know there are germs in bathrooms, but may not realize tha

A Simple Solution

Since many germs are spread by hand contact, practicing good hygiene every day is a solution t

A list of "99 Places Where Germs are Likely to Lurk" includes:

At work-elevator buttons, phones, shared ink pens

At the gym-exercise machine handles, mats

When traveling-subway poles and handles, gas pump nozzles

At school-shared toys and books, cafeteria trays, playground equipment

At home-pet toys, light switches, thermostats

When shopping-escalator handrails, shopping basket handles.

Knowing where germs are and practicing good hand hygiene can help keep families healthy.
