Article Body:

When you call toll-free or pay-per-minute telephone numbers your telephone number is identified

Call ID blocking only works with other residential phones. You cannot block your phone number

There are no current regulations concerning the use of ANI and consequently, businesses which

Not all companies use your information for future sales calls or sell your information to other

There are three ways that you can avoid having your telephone number used by companies for sales

1) When you call a business, toll-free number, or pay-per-minute number, tell the company that

2) Avoid calling any pay-per-minute number such as numbers in the 900 area code! Pay-per-minute

3) The best way to keep your number private and avoid unwanted calls is to use two telephone lines

I have one telephone line which I never answer. I use this telephone line to make outgoing calls

When using two telephone numbers, provided by your regular telephone company, it is important
