hemorrhoids, hemroids, piles, health, treatment, symptoms

Article Body:

Many people are embarrassed to visit their doctor to have a consultation for their hemorrhoids

Consulting a doctor when you are experiencing the symptoms of hemorrhoids is always the best t

If you don't have a family doctor to consult with, you can go to other general practitioners l

When consulting a doctor, it is important to describe the symptoms in a detailed manner to hav

Pain - The anal area have many nerve endings that is why it is sensitive to pain. Painful flan

Bleeding - The color of the blood is an indicator of the location of the bleeding - bright red

Mucus or pus - Having some mucus or pus discharge is not associated with hemorrhoids.

Change in bowel habit - When you are under emotional stress, tension, trauma, or diet change,

Change in the shape and characteristics of your stool - When your stool is colored brown or ye

Swelling - A person with hemorrhoids will always have the swelling symptom, but this may also

Itching - Hemorrhoids, food and medicine allergies, skin diseases, stress, etc. can cause chro

Bulges and protrusions - Prolapsed internal hemorrhoids will cause bulges in the anal canal wh

Not all of these symptoms will lead to a diagnosis of hemorrhoids. Consulting a doctor is not
