

Title:

Children and Head Lice

Word Count:

451

Summary:

A lot of children get head lice, for a few different reasons.

Keywords:

Head lice, lice, nits

Article Body:

Children are especially susceptible to head lice for a few different reasons. Children tend to  
Aside from these reasons, children also congregate in large groups, such as in childcare centers.  
Head lice cannot fly or jump, but they do cling to the hair and other items, attaching themselves

Another means in which a child can catch head lice is by using pillows, blankets and bed linens.  
To determine if your child has head lice, you have to use a comb to part the hair and examine  
Head lice move very quickly, sometimes making detection very difficult, because of this you should  
Examine the scalp closely, as well as the area behind the ears and at the nape of the neck. Though  
Though frequently scratching the scalp may be a sign that your child has head lice, itching does not  
If your child has head lice they may develop small, red bumps on the scalp due to scratching.  
Because some of these symptoms of head lice may not be obvious right away, it is important that
