

Title:

Death of the Windsor Retaining Wall

Word Count:

569

Summary:

The Windsor stone is rapidly being replaced by other materials used to build retaining walls.

Keywords:

landscaping, retaining wall,

Article Body:

My father asked me the other day, what question did I get most from my landscape and lawn care

Customers and potential customers alike are always amazed about the high cost of landscape des

The second question is one that continues to evolve. Not long ago, when a customer wanted a r

1. Materials: When choosing materials, select the type that is best suited for the desired res

2. Type of wall: The type of wall you choose should be determined by need. Decide if you need

3. Determine design or on-site placement: Planning ahead will help you avoid the expense and t

4. Drainage: Most retaining walls fail because of pressure against the wall caused by water on

5. Foundations: A wall is only as good as its foundation, and all retaining walls should be bu

6. Cant or batter: Walls are more stable and structurally secure if they slope back or "lay ba

7. Anchors: Timber walls and other walls of solid horizontal materials usually have "T" anchor

Installed wall costs generally range from \$20 to \$35 per square foot of wall face for dry-laid
