Don't Let Termites Eat You Out Of House And Home

Article Body:

According to the National Pest Management Association, termites destroy more homes each year t

"Unless you live in Alaska, where it gets very cold, your home is at risk," says Bayer Advance

Termites are attracted to houses because houses often contain two major food ingredients for t

"Think about where the wood in your house is located," says Kukorowski. "It's behind your wall

Preventing easy access to your home is a key defense against termites:

&#8226; Fix plumbing and roof leaks.

&#8226; Divert water at least 18 inches away from your house with properly functioning downsp

&#8226; Keep firewood at least 10 feet away from the foundation of your home.

&#8226; Do not let mulch or soil touch siding on your home. Better yet, keep it about a foot a

&#8226; Eliminate all "wood/ground" contact near your home, except if the wood is pressure tre

&#8226; Seal foundation cracks (to help prevent moisture from entering).

&#8226; Hire a professional to conduct an annual inspection.

&#8226; Another solution is to apply a new generation of termite and carpenter ant killers mad
