Article Body:

Marshmallow blow guns are safe and fun for boys and girls of all ages. Even dads will enjoy th

The first marshmallow blow gun I ever received was at a birthday party. We played ^Capture the

If you want to know how to build and shoot a marshmallow gun, the plans are below. Learning ho
tricky, so we are giving the Marshmallow Gun-Shooter Plans to you for free!

Building the Marshmallow Gun

1. Buy 1/2 inch PVC pipe, 2 PVC elbows, 2 PVC T's, 2 PVC end caps, spray paint, marshm
2. Cut your PVC pipe however long you want the barrel.
3. Cut four pieces of PVC pipe 1/3 of the barrel, two for the handles and two for connecting p
3. Get two T's, two elbows, and two caps. Place the smallest piece of PVC pipe in between the
the top PVC pipe. Put the barrel in the t that's PVC pipe has a cap on the end of it.
4. Now, place the PVC pipe that is 1/2 of the barrel on your elbow. Put a PVC pipe (1/3 size o
5. Place the last PVC pipe (that is 1/3 the size of the barrel) on the T. Place the last cap o
6. Now that the pieces are all put together start spray painting the marshmellow
gun. The marshmallow gun can have designs. If you want designs, cut shapes out on a piece of p
7. Let dry overnight.

As a side note, you will have leftover materials since PVC only comes in ten foot lengths. Cut
takes awhile. Some people choose to buy these guns completely made since you can find them onl

Shooting the Marshallow Gun

First, put a marshmallow in the beginning of the nozzle, the top piece. Do not put it in the

Since you know how to build and shoot a marshmallow gun or shooter, run out to the store and b
